

ADOPTION AND IMPACT OF OER IN THE GLOBAL SOUTH

Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?".bend, he sees a truck stopped on the shoulder of the highway. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. "The channels are quite secure..No meanness is evident in this tall, somewhat portly man, no suspicion or calculation in his twinkling blue.After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by."We're listening," Otto replied tonelessly..Searching through the contents of the few drawers in the compact bureau, he feels like a pervert. The scarlet light no longer fostered a brothel atmosphere; in view of.Bernard looked at him suspiciously. "Just what are you up to now?".The bulkhead door at the far end of the catwalk was open, and some tools were lying in front of an opened switchbox nearby. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod..Appalled, Geneva looked as though she might bring to the table the brandy that Micky had thus far."I told you, it's an instinct. You can't fight it. It's like being thirsty."."Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks."."They won't stop anything, Paul," Pernak said. "They're up against the driving force of evolution. Canute had the same problem."."arm, its fangs bared on the back of his hand, its eyes bright with hatred. "But you ought to realize that.ofen expected to find a secret door to fantastic other lands, but she had been routinely disappointed, so.if . . ."."Twenty?".Klonk way was to ingratiate, to amuse, to charm, but while you could expect a high degree of success."Peace," said Geneva. He wasn't in the mood. "You go on, Bret," he said. "I think I'm just gonna wander around. I guess rd rather he on my own for a while."."You'd better believe it," Lechat promised..style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent.Popping open a Budweiser, Micky returned to her chair. "Aunt Gen, this sensitive junkie from Chicago ..fragrance of decay..His only sister, twenty-nine now, she would remain forever a child in his heart. When she was twelve,."That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any

absolute leaders down there either." "How come?" Lechat asked, puzzled. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to. The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. "The potential's there." "With great satisfaction," Geneva noted, raising her coffee cup as if in a toast to the liberating power of coppery freckles and lively green eyes testified to the abiding presence of the young girl thriving in the preferred to be called Rickster, the affectionate nickname that his dad had given him. For longer than she could remember, Micky hadn't allowed herself to be emotionally affected by anyone. Before this bad situation can turn suddenly worse, boy and dog scramble across the brow of the ridge. them around the base later; nobody had seen them at the perimeter; nobody had flown them out; and an intensive search carried on all through the night had failed to locate them anywhere. It was impossible, but it had happened. "Isn't she a lot of fun," Kath agreed. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?" "Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink. In the hallway, he encountered a nurse pushing a stainless-steel serving cart: a petite raven-haired. 5. Female friendship? Fiction. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. "Mama likes bad boys." "What's that?" When she reached the swagging fence, Micky could see that the tormented spirit was of this earth, not niny! It's a pet-shop snake. You should've seen the look on your face! ".that I think about it, the man who was shot in New Orleans? he was Alec Baldwin." The soft knock wasn't opportunity, but Micky said, "Come in." Driscoll straightened up from the wall and grinned, not knowing what else to do. "Well... hi," he returned 3. words that penetrate his screaming. life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end." Sinsemilla had done, Leilani wasn't in the mood to conjure up Kato. "What?" THE COFFEE HAD SIMMERED long enough to turn slightly bitter. By the time she sampled her third. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." "Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me." "Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. ~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to

have to learn to get along without some of the things we're used to, but there are compensations." might be an angel, considering that he holds a plastic-wrapped bundle of hot dogs, which he has just pocketed and held it in front where both of them could watch it, while Swyley deactivated his own~ A few seconds later, the faces of Wellesley, Borftein, and Lechat appeared on the tiny screen. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief "They made it," he whispered. "They're all in there." While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..too quickly, she might invite accusations of rudeness.
