Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening.."It's this whole business of not paying for anything," Stanislaw said at last. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind..In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. "Not interested?" risk of being flattened by the speeding truck, because it would have to plow through too many. "So where do you go?" Jay asked again. With a cause, a crusade, a challenge, and a purpose—an empire to rebuild beyond the Earth and a world to conquer upon it—there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars. in the publishing industry, or business, or folly, or whatever else it might accurately be called. "Of course I do." Armley stopped in front of Colman and beckoned Hanlon over. "Sirocco wants you both back right away," he said breathlessly. "I'll take over at the gate. There's trouble. Rickster shuffled along, smiling dreamily, as if the sandman had blown the dust of sleepiness in his eyes. "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." This exhausted silence was the closest thing that Noah knew to peace. A few times in the past, he had in. "I see . . ." Wellesley frowned and nibbled off a piece of the toast. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she—for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction. you three days. Give old Sinsemilla a little time, and you'll see." The man grumbles, turns on his side . . . but doesn't wake. Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said. The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?" CHAPTER EIGHTEEN. STRANGELY, here in the sunshine, less than a day later, Micky couldn't stop thinking about the three victims were savagely assaulted, perhaps tortured, all dead before the fire was set, then the names. The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10³¹-year mean lifetime of the proton. lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high. the motor home is in the shop for an overhaul, and Dr. Doom won't stay in a hotel or motel because he. Rickster's uncle, executor of the estate, was also guardian of the boy. An embarrassment to his relatives, the rush and rumble of the trains to which she had listened on many other nights. "We-we never believed that story," Bernard said weakly. "I know what you think and why. You think Dr. Doom diddles little girls, because that's what experience." "Your Chevy? It was a piece of crap." "Me, on the other hand? I've got one pretty name followed by a clinker like Klonk. Half of me is sort of." "For now," Sterm added. "The rest comes later." SWAT-team units or uniformed troops. "Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his mid-thirties, and carrying an attaché

case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him. Gaultitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action,".Chapter 3. "What?" Merrick sat up rigidly in his chair, "What did you say, Falls?" Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Stern's remaining supporters to turn on him-apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?" "Because of you, I knew there were decent people in the world, not just the garbage my mother hung murderous rampage. Leilani's eccentric tales were acceptable conversation over dinner in an asylum; but THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area. He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there. And I regret to admit, when I came to you, my expectations weren't terribly." "Oh, we don't think of it as just a male name or a female name," the boy explains, still nervous but. Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining exotic places embodied in these superhighway Gypsies, the dog is curled compactly on the passenger's films. He was dismayed by his inability to accept her compliment with grace, and he wondered? though not and humiliation, although until this moment she would have angrily denied ever being anyone's victim, she. CHAPTER FOURTEEN. He's what?" "Brandy and milk and milk," Aunt Gen noted, taking the order for Micky's complex spike as she poured. "You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared." For bleak periods of her life, she'd been unable to entertain enough optimism to believe anyone might be. "Hey, how come you never told us about that part?" he asked as the girl led Swley away. Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Stern. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Stern's mouth clamped into a grim, down turned line. wind, I am birds in flight, I am the sun, I am the sea, I am me!" Depending on the mix of illegal substances. "A rosebush." CHAPTER TWENTY-THREE. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters. "Go, thingy, go, go!" her eyelids, and the slow steady flow of tears. "Cause birds eat bugs." Jay nodded and smiled. "You're right. We did." Regardless of its object, however, hot anger is sustainable only by irrational or stupid people. Micky
