So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking..longer, twinkles diamond-bright and ruby-red. From this elevation, he can see the interdiction point to the.After walking another mile, he came to the all-night market that he'd specified for the rendezvous..recognized too well..In the main ground-floor hall, past the nurses' station, Noah encountered Richard Velnod. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces bad not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance.Only Aunt Gen, last of the innocents, would call them boyfriends? those predators, pariahs proud of.hundred, until she either fell asleep or broke down sobbing and then fell asleep.."You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it..".waited neither a lady nor a tiger, but an altogether unique specimen. Leilani would have preferred the."Mama likes bad boys..".she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning.right. Then the jig would be up for our friends, the ETs. They'd be so busy dodging alien hunters that they.Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion..Shunning suicide, old Sinsemilla nevertheless embraced self-mutilation, though in moderation. She.Colman kept a poker face. "What made him think that?" "A little extraterrestrial DNA..".While staring at Sterm, Borftein tapped Judge Fulmire's personal call code with his fingertips and moved the compad quietly beneath some loose papers lying against a folder in front of him on the table..either corner of her mouth, and no sportive note informed her voice as she met Micky's stare with a.Hanlon made a throwing-away motion in the air. "Whoa there, son, what's the' matter, where you going?"..If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated

world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?".BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of.suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up.with bent knees, drops, rolls through cold dew, through the sweet crisp scent of grass that bursts from."How about that?" Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. "Figured it out yet?".Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. Colman watched until they had all left, then returned to the others..This time, the pacifist didn't smile. "Guess I should have said do the smart thing.". "The half that's left is off-limits," Micky declared. "The only pie in play is my piece.".Over bleating horns, screeching tires, and squealing brakes, another sound flicks at the boy's ears:.The debate continued for some time, but Wellesley was still the Mission Direct6r and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative.". "Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. She issues a low growl.."Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic."In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the ship. And find out how many more we can get up here from Canaveral."."How else could it be?" Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation.
