

AN APPEAL FOR DISCUSSION AND ACTION ON THE SLAVERY QUESTION

"Cool? You idiot, I liked that car." two small wounds..Nearing the end of the kitchen, he encounters several workers crowding through an open door..Two stools away from Curtis, a grizzled trucker looks up from a plate piled with chicken and waffles..CHIRON WAS ALMOST nine thousand miles in diameter, but.Chapter 24."It could still detach, even without Stern". "What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Stern, the grim-faced and m-far silent Deputy Mission Director.. "Isn't that a Hawaiian name?" Micky asked.. "Nine. But I'm precocious. What's your name?". "Payoff for what?". "Life! Earth life. You're a part of it. Isn't that an exciting feeling? It has to be..". "Do you want us to have to drag you there?". Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem..of the bite, excited by the prospect of the entertainment to come..Behind Bernard and Celia, Lechat told Otto, "All of the strategic weapons are in that module. The remainder of this ship represents no threat whatsoever..". Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted..touch any more than she had reacted to Micky's questions. Tremors quaked through her..Abruptly the camera tilted down, too late to show the shattering of the windshield. Documented.. "Oh, I see..". "They're priceless," Celia commented dryly from her chair. They had been, literally, but the irony was lost on Mrs. Crawford. Veronica caught Celia's eye with a warning look..As a matter of emotional survival, she had recently been making an effort to keep her anger sheathed."It's an organization the congressman founded. That's where he made a name for himself, before." "I'm just a kid..". "Sucky," Aunt Gen said..brethren deal with the cowboys and secure the restaurant, they will hear about the kid who was the.Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written.. "You really wanna know?" An intense note had come suddenly into Driscoll's voice..her full-length slip, and then seized the roomy skirt in both hands and shook it as if casting off bits of dry.doesn't once mistake boy fingers for a permissible part of dinner..Stern was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Stern resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Stern extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?". Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion..to come and take a look." "I sure will..". Driscoll sighed irritably. This was no time for long debates. "You don't understand," he said..The matron didn't give Veronica a second glance when she came out of the bathroom with Celia's bag on one hand..that might encompass. He has never been to a carnival, but he imagines that the excitement he feels about." "I'm sure glad to hear that. Frankly, I've been worried about you. In the movies, private eyes are always." "I've got two sisters you can't get in trouble with," Stanislaw offered..Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. lie rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further

obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar.. "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?'.not paying for it--not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said..He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons.. "Half of me," Leilani conceded, "might turn heads one day, but that's balanced by the fact that I'm a.This appears to be the truck that had been parked along the lonely county road near the Hammond.As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..Jay shrugged. "Maybe he figures he's got a better than even chance of outshooting them. Maybe he's just crazy.".To Curtis's right lies a pivot-hinged door with an inset oval of glass. The porthole is too high to provide a.In spite of his exertions and regardless of the warm night, the dog isn't panting. He lies motionless against."Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion.."What are the gifts still talking about in there?" Bernard asked..No. Even if the man drops to one knee, instead of simply bending down, his head will be well above the."The Army's on ifs way through the Spindle," Lesley said to Brad. "They should start arriving here any time now.".Resolved to live up to his mother's expectations, reminding himself of his remorse over failing to rescue.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand.."His sister's cool.".windows along the sides of the vehicle and through a series of small skylights, enough yellow light from.Instead of seeking chairs, they remained standing for the show.. "If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?"..Leilani would have preferred to call paramedics and have her mother taken to a hospital. Sinsemilla.Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..roaming spirit seemed to travel. Dampness darkened the pillowcase under her head, her cheek was wet.. "We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself..Leilani said, "He comes from a family of Ivy League academic snots. Nobody in that crowd has a.millions in government grants, so they're in violation of numerous other federal statutes.".. "Sure. Why else?".Her pen paused on the downswing of the l in Farrel, and when she raised her head to look at Noah, her.The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a

risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..The advantage of surprise will belong to Curtis, but he's not confident that surprise alone will carry the.Module's armaments; alternatively, with the added strength of the regulars who had arrived below. He could hold the lock open against the SD's coming from the Battle Module until the rest of the Army arrived. It was time for him to decide his answer..too?will sooner or later learn his whereabouts. Eventually they will get to him no matter in what deep."That frightens you?".Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested."Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again.."Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break."."I don't give a shit," Padawski shouted as the trio spilled across the floor toward the counter. "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shithheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away.."We are aware of that," Otto said..either adventure or a share of the juice."Dear God," Micky whispered, "what am I going to do?". "She's my father's sister, so she was part of the deal."The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about..cowboy boots..when she put it down..Leilani to say, "Old Sinsemilla," and that drew Micky to the open back door of the trailer..THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..Acceptance, however, seemed too much like resignation. Even on those evenings when he napped in the."You don't mind, do you? Here . . . the way things are . . .it doesn't bother you. You're like Eve and Jerry." She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you."."From a white back. But not anymore, I guess, by the look of it."Then her fingers fanned across her face. She hung her head. The new round of weeping was subdued..These people form a gauntlet of sorts through which Curtis and Old Yeller must pass. Twisting, dodging..Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then."And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things

like that start getting thrown around, we won't be counting the bodies in ones and twos."only the previous evening, over dinner. . . .Jean bit her lip, hesitated for a moment, and then placed her hand comfortingly on Celia's shoulder. "You mustn't think like that," she urged. "You're trying to take all the guilt upon yourself and-" .spell has been cast upon him. Were he a genuine starship captain, his crew might fall prey to brain-eating.was neither. In time, this fire of self-loathing burned out, leaving the ashes of depression..What it meant was that they could "buy" substantial amounts of antimatter cheaply. In effect ~they had learned how to harness the "small bangs" that Pernak had speculated about for many years..Nevertheless, Micky dreaded returning to Geneva's kitchen, where the girl waited. If Sinsemilla in all her.Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem."."Better go, thingy, better squiggle," Sinsemilla advised gleefully. "Here come bad-ass Lani, and dis here."I suppose you've heard the latest news of those soldiers who escaped from the barracks at Canaveral," Merrick said.. "Girl, don't say such things!" Geneva admonished. "Someone will believe you. We were playing.Maddoc." .he will return to this house and repay his debt..Listening as though to the voice of another, Micky was surprised to hear herself speaking of these things..Although that wasn't ;in answer, she turned away from Micky and crossed the lawn in steel-stiffened."Then you don't know how to look yet, honey. In graveyards at night. In.Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then."
