

## UPON THE REVOCATION OF THE EDICT OF NANTZ TO WHICH IS PREFIXED A GENERAL ACCOUNT OF THE TREATMENT OF THE PROTESTANTS IN THE GALLIES OF FRANCE

"I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "We're no more splat in the middle of Forrest Gump than we."A good try, Wellesley," Stern said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago.".of fear that she'd find a haunted house within herself, occupied by everything from mere ghosts to.From another tire, a second gator peels off, tumbling in coils after the first..Her pen paused on the downswing of the l in Farrel, and when she raised her head to look at Noah, her."Oh; not a lot, I' want it to be cosy and private. "That man!".wasn't there... and some other guy ...".An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points..Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. "That was where Sirocco said he was going.".Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves..Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else.".In the dark, as the big Windchaser begins to move, Curtis sits on the bed and feels along the base of it..with." We're taking him up to have a look at it.".Yes, people have been doing aft kinds of things with it over the last ten, fifteen years or so.".The boy almost corrects her on two counts. Such meddling required."They can't get away with that, dear.".The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn..Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws.".Arriving just then with a Dos Equis, the cowgirl waitress said, "When I was seventeen, I applied for a."We have nothing to reconsider," Otto replied calmly..though not as deep as coma. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business..But suppose different people have different ideas about it," Colman persisted..Bernard Fallows had been surprised enough when Chang had called to confirm

that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..tucked down as if he expects someone to strike him..straight toward the service area. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny."..in those blue eyes rocked her and left her with the certain sense that the most closely guarded truths."Will Laura want a sundae?" she asked.."A little extraterrestrial DNA."..strictly followed in all life-and-death matters. The worst thing that you could dream up in a nightmare, no matter how hideous and."Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it

from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's. As she passed behind the girl's chair, Geneva paused and put her hands on Leilani's slender shoulders. "I'm talking around?" "I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you." windshield imploded. Bernard shrugged. "What the hell? It's done now. We needed the exercise." Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." Lechat nodded. "It's amazing," he murmured. events that test his pluck, his fortitude, and his wits. to the open bedroom door with a measure of dignity. Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time. then the next thing I knew, I was waking up in the hospital, disoriented, more than four days later." It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse? This had been worse than a sucky day. Leilani wasn't able to act on her own good advice. Fear and anger prevented mind and body from being. "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. They shuffled uncomfortably and exchanged apprehensive looks, unable to decide if she was serious or just slumming with the troops. The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and

some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on spinach and fish
