The Creation of Ea is the foundation of education in the Archipelago, By the age of six or seven, all children have heard the poem and most have begun to memorise it. An adult who doesn't know it by heart, so as to be able to speak or sing it with others and teach it to children, is considered grossly ignorant. The prospect of spending the long grey winter at Westpool sank his spirits like a stone. There was nothing here for him except the girl Dragonfly, who had come to fill his thoughts. Her massive, innocent strength had defeated him absolutely so far, but he did what she pleased in order to have her do at last what he pleased, and the game, he thought, was worth playing. If she ran away with him, the game was as good as won. As for the joke of it, the notion of actually getting her into the School on Roke disguised as a man, there was little chance of pulling it off, but it pleased him as a gesture of disrespect to all the piety and pomposity of the Masters and their toadies. And if somehow it succeeded, if he could actually get a woman through that door, even for a moment, what a sweet revenge it would be!. drunk by his cold hearth.. "I learned about this from Ard," he said, and paused again.. A man came out of the stone tower. He passed them, walking hurriedly with a queer shambling gait, "Irian?". Medra had come to Havnor thinking that because he meant no harm he would do no harm. He had done. "When I go back to the Tower," he said, "I'll ride.. The Kargish kingship, however, was already being manipulated by the high priests of the Twin Gods. Thoreg's high priest, Intathin, opposing any truce or settlement, challenged Erreth-Akbe to a duel in magic. Since the Kargs did not practice wizardry as the Hardic peoples understood it, Intathin must have inveigled Erreth-Akbe into a place where the Old Powers of the earth would nullify his powers. The Hardic Deed of Erreth-Akbe speaks only of the hero and the high priest "wrestling," until: "I'd say," she said, her voice thin and reedy, speaking to the curer, "that if Alder's beeves stay. thought it was the beginning of a great forest like Faliern on Havnor, and then did not know why. "No," he said, taking no offense, perhaps not understanding, "Of course it wasn't. I beg your pardon," she said.. "If it hasn't rusted shut," Dulse added.. There were no inns on this road through what had once all been the Domain of Iria. As the sun neared the western plains, they stopped at a farmhouse that offered stabling for the horses, a shed for the cart, and straw in the stable loft for the carters. The loft was dark and stuffy and the straw musty. Ivory felt no lust at all, though Dragonfly lay not three feet from him. She had played the man so thoroughly all day that she had half-convinced even him. Maybe she'll fool the old men after all! he thought, and grinned at the thought, and slept.. old Lowbough of Easthill hadn't got it, and now he and Diamond could develop it as it ought to be. Again he paused. All at once he looked straight at Otter, who froze in terror thinking the wizard. A quarrel between brothers over their inheritance divided them. One heir mismanaged his estate through greed, the other through foolishness. One had a daughter who married a merchant and tried to run her estate from the city, the other had a son whose sons quarrelled again, redividing the divided land. By the time the girl called Dragonfly was born, the domain of Iria, though still one of the loveliest regions of hill and field and meadow in all Earthsea, was a battleground of feuds and litigations. Farmlands went to weeds, farmsteads went unroofed, milking sheds stood unused, and

shepherds followed their flocks over the mountain to better pastures. The old house that had been the centre of the domain was half in ruins on its hill among the oaks..green, lilac, purple -- a veritable masked ball. Then they were gone. I stood up. Mechanically."They sent me here. They said, "All the foreigners in one basket."" The stranger was in his thirties, with a blunt face and a pleasant look, dressed plain, though the cob that stood behind him was a good horse. "Put me up in the cow barn, mistress, it'll do fine. It's my horse needs a good bed; he's tired. I'll sleep in the barn and be off in the morning. Cows are a pleasure to sleep with on a cold night. I'll be glad to pay you, mistress, if two coppers would suit, and my name's Hawk." "Of course you do. You'd better. I'll witch you if you don't." Diamond sat upright and still. My little stone celibate cell. It had a window looking out on a back-street. No spells - you can't make spells with all their magic going on. But she wanted to come, and came, and I let a rope ladder out the window, and she climbed it. And we were at it when the old men came in! I showed 'em! As a rule, people do what wizards advise them to do. And it is no small honor to be invited by a wizard to be his student or apprentice. Hemlock, who had won his staff on Roke, was used to having boys come to him begging to be tested and, if they had the gift for it, taught. He was a little curious about this boy whose cheerful good manners hid some reluctance or self-doubt. It was the father's idea, not the boy's, that he was gifted. That was unusual, though perhaps not so unusual among the wealthy as among common folk. At any rate he came with a very good prenticing fee paid beforehand in gold and ivory. If he had the makings of a wizard Hemlock would train him, and if he had, as Hemlock suspected, a mere childish flair, then he'd be sent home with what remained of his fee. Hemlock was an honest, upright, humorless, scholarly wizard with little interest in feelings or ideas. His gift was for names. "The art begins and ends in naming," he said, which indeed is true, although there may be a good deal between the beginning and the end..Ivory's spell of semblance dropped away like a cobweb. of a huge domed chamber. Hurrying, sticklike figures black against the blaze shoveled and reshoveled ore onto logs kept in a roaring blaze by great bellows, while others brought fresh logs and worked the bellows sleeves. From the apex of the dome a spiral of chambers rose up into the tower through smoke and fumes. In those chambers, Licky had told him, the vapor of the quicksilver was trapped and condensed, reheated and recondensed, till in the topmost vault the pure metal ran down into a stone trough or bowl-only a drop or two a day, he said, from the low-grade ores they were roasting now..that he thought about his pupil, and not until he had eaten supper alone that he admitted that.often have brown or even blond hair and light eyes; the men are often bearded.
