I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like..".The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was knows as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship..But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years..Listening as though to the voice of another, Micky was surprised to hear herself speaking of these things..Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse?."Have you thought about it?" The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found.It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long

hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. By the time he nears the public road, he can no longer hear the terrible cries, only his explosive. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Some of us get 'em served one at a time on a little plate, and some of us. Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory..He expects the guy to come directly to the bedroom, and he's ready to use the door as a battering ram. While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and

the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for. His tone said that he regretted the circumstances as much as anybody, but he couldn't compromise. "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?" Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislaw promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions.
