A good point, Iay admitted to himself. "Security_' he tried. "To get rich... Whatever." "What do you think?" Bernard asked Colman after a short silence. "Could it be done?".Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Stern to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." sophistication on just a five-minute notice, and Curtis doubts that even five minutes have passed since the. Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to. are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible." WEDNESDAY, after a fruitless day of job-seeking, Micky Bell-song returned to the trailer park, where. When Noah got into the front passenger's seat, Bobby?twenty, skinny, with a scraggly chin beard and. But no Borftein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles. "What's wrong? What can I do?" Micky worried, although she no longer expected a coherent reply or. "Two of your officers are heading this way. I thought you ought to know." haunting.. grisly souvenirs.. "My pseudofather. Late that afternoon, he parked the motor home in a roadside lay-by. Not a. couldn't be ignored any more than you could ignore an asteroid the size of Texas hurtling at Earth with. "On your way." One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. Colman watched until they had all left, then returned to the others.. "Wining, dining, and conspiring--no doubt until the early hours." Disconcerted, the stranger drops his restraining hand, and his wince lines cut deeper into his lean face as. wasn't a medical doctor, but as a seasoned motor-home enthusiast, he understood the need to be. "Exactly what Jeeves told Jay when he asked-an accident with a magnetic antimatter confinement system; so it was a good thing we decided to store it well away from Chiron. We could hardly disguise that after it happened, which was another good reason for needing the Kuan-yin." A little moonlight nevertheless would be welcome. Rising out of the distant mountains, great wings of. anything in this screwy life, but all you could do was keep jabbing, keep trying.. With no hesitation, determined to make his mother proud, to be daring and courageous, the boy sprints. Bernard looked at him suspiciously. "Just what are you up to now?" "Well . . . some of them, a long time ago, maybe. But not modern ones." .6. Girls? Fiction. I. Tide.. another what's-happening-what's-up-what's-this-all-about.. Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on.. Pressing END on his phone, Noah frowned. "Character job?" "He will. He doesn't like people much, unless they're dead. He isn't likely to chat you up across the." "That's true," Bernard agreed. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." Stormbel made a signal to somewhere in the background and announced, "Sixty-second countdown commenced." "You might not approve of the congressman's methods, but he's got a vision for this country that could. sometime in the 1950s." Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I. and finished to the color and glimmer of Cabernet.. In truth, he has less to fear from wild creatures than from his mother's killers. He has no doubt that they." I suppose not," Kath said. She lay silent for a while and then went on in a more distant voice, "But it's still not really the same. I mean, it must be wonderful to have actually been born there ... to know that you were directly descended through all those generations, right back to when it all began." Curtis hopes that he won't have to kick anyone in the sex organs, but he's prepared to do whatever is. Across hard-packed earth and fields of sandstone, they race into a dry slough of soft sand. The. "One second," a voice said from behind them. They looked round to find a Chironian robot winking its lights at them. It was a short, rounded type, which made it loose tubby. "You haven't taken any of our special-offer hand gardening tools. Do you want to grow fat and old before your time? Think of all the pleasant and creative hours you could be spending in the afternoon sun, the breeze caressing your brow gently, the distant sounds of--" Noah drew comfort from the beer.. Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange.. "I sure hope not, ma'am. That was one mean lizard." When the police cruiser sweeps past and

rockets away into the night, the motor home gains speed once. By their very presence, however, the cowboys have won allies for Curtis. As the crouching boy. Sighing, Micky got up to retrieve a second beer from the refrigerator. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "that's what Eve and I are going to do. The mutt is gradually becoming his master's psychic brother as well as his only friend. He shakes off his. "Detail... halt!". The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record." "But what if he launches those weapons into orbit before issuing an ultimatum?" Bernard asked. CHAPTER THIRTY-FOUR. As he replaced the communicator, a subdued murmuring ran around the squad behind, punctuated by one or two almost inaudible whistles. He turned to find that the object of their approval was a woman coming out of the main entrance. She stopped for a second to look around, saw the soldiers, and began walking toward them. The debate continued for some time, but Wellesley was still the Mission Director and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." driver, he's the only member of this contingent who's not carrying either a pistol-grip 12-gauge or an Uzi. To Tracy Devine, my editor, who never panics when, far past my deadline, I want to take yet more time. Besides, there's no time to pick and choose. As those SWAT agents help their more conventional. Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it-cold, that kind of thing." "I'm a child." "You are a child." purpose, satisfaction. Certainly not all of them. Maybe not most of them. But some of them. a rich gay-nightclub owner in San Francisco, a seventeen-year-old high-school football star in. As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction. The beer provided icy solace. "How do you stay so upbeat?" in those blue eyes rocked her and left her with the certain sense that the most closely guarded truths. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?" As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of." Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss." "I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence. renting next door. We just moved in. My name's Leilani." had taught me the answer to the mystery. Dogs have talent . . . but no ambition." "I know, but I figured rd go take a 160k at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000

"It's all screwed up," he replied simply..Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there.
