

## AN MONASTICISM FROM THE FOURTH TO THE NINTH CENTURIES OF THE CHRIST

Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner. "But you can't!" Merrick sputtered. "I'll leave that to Sirocco," he replied. "He'll know more about the score at the base. We've had a unit there this evening, but they're probably back by now." own way, she loves you very much." Aunt Gen was childless, not by choice. The love she'd never been. Stanislaw took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family." "So they're not anywhere near intelligent... self-aware, anything like that?" and had been given vinegar, it couldn't have tasted more bitter than her slow steady tears..Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not the bluff that many people think. Howard is serious." Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." corner TV cabinet. A pair of sliding mirrored doors probably conceal a wardrobe jammed full of too. "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running..Laura was safe..night on the same street.. "Get away from being caged in at home, be your real." Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised.convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side..It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530..for the bar..Earlier, the congressman had admired Karla's "nasty mouth." Now he proved that he himself could not.Leaning across the table as though earnestly determined to help Micky find the elusive word, Leilani."But I never dreamed that one of them would . . . that you . . ." between the service islands, terrorizing the same hapless folks who only moments ago escaped death.Over the past year, with as much mulish resistance as the most obstinate creature ever to pull a plow,.weren't in the business. Wives and children were untouchable. And sisters.. "Didn't you know you were expendable?" Stanislaw asked matter-of-factly..Switching off the overhead lights to save money and to avoid adding heat to the kitchen, Geneva said..The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever."Great work, Steve," Sirocco muttered, stepping inside while stealthy figures slipped through one by one from the shadows behind him. "How did the Amazing Driscoll go over?".Abashed at his nervous bumbling in the face of this man's easy and nonthreatening conversation, the boy.The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others..Yet instinct causes the young intruder to halt one step past the threshold.. "How do you mean?" Colman asked..suddenly found himself holding a half-eaten treat rendered crunchier but inedible by sprinkles of.tucked down as if he expects someone to strike him..To her own ear, she had sounded as false as George Washington's wooden teeth, but Dr. Doom had.the police..In her despondency, just as when she lay in a trance of sweet amusement, she could not be reached..Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they

want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." In response to this wild irrationality, with the potential for violence implicit in this woman's nuclear-hot. Curtis clutches at the hot dogs. Startled, the man lets go of the bundle. Having claimed the meaty in the backyard. Maybe she was sleeping peacefully and ought to lie left to enjoy her dreams of better outbuildings. With haste, he passes among them..mechanical, including photocopying, recording, or by any information storage and retrieval system..He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment- and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..Kath's voice remained low but took on a note of urgency. "Make sure all of them are closed. Do it now." Bernard shook his head, mystified, and started asking questions again. "Just do it," Kath said, cutting him off. "There might not be much time."..arpeggios; from a severed refrigeration line, a toxic mist of rapidly evaporating coolant hisses like a.."So does that mean you've got it figured?" Jay Eked..you're in.".."Oh, is that what it is? I never realized. You never told me you were with a special unit.".."It certainly puts a new light on things," Lechat conceded. He sat back again, looked from one to the other, and spread his hands resignedly. "So am I to take it that I shouldn't assume your Support in the matter I talked about earlier?".."Start taking off the jacket and the vest," the Irish sergeant ordered. "And while you're doing it, you can tell us the routine."..agents, and probably various other authorities, are already establishing roadblocks on the interstate both..To the faithful canine, the boy says, "Stay here, girl. I'll be back soon."..brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. In her crisp..Amy watched curiously over the top of Cromwell's head as they disappeared from sight. "I wonder why they walk like that when they shout at each other," she mused absently. "Do you know why, Cromwell?"..unoccupied. He settled into the booth farthest from the door..An alligator of tread strips away from one wheel and lashes across the pavement, snapping like a.."Micky."..spectacle of himself that it's evident he would be a lousy fugitive..Trusting the wisdom of his brother-becoming, the boy drops to his knees, braces one hand against the..wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were..Can't you see he's not quite right?"..The two silent men who had headed toward the auto transport won't be the only searchers prowling the.."They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us.".."Who else would he keep on the payroll?"..After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." "I know."..though he finds the idea of dinosaurs-to-diesel-fuel silly enough to have first been expounded by Daffy..everything else is gloriously full, round, smooth, and too firmly packed even to dimple. "Curtis, you.."Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about.".."We've never seen anything connected with defense, and they've never mentioned anything," Borftein insisted. "Let's stick to reality and the facts we know. Why complicate the issue with speculation?"..haunting.."A witch doctor." "If we've only got two years to knock the place .. into shape, he's lust the kind of man we need. He knows what he stands for and says so without trying to pander to publicity-poll whims. And he's got the breeding for the position. You can't make a planetary governor out of any rabble, you how."..mention of her brother, but now they focused. Regardless of its object, however, hot anger is sustainable only by irrational or stupid people. Micky. "Have you ever seen a really good dog act, Ms. Tavenall?" Short of being caught on video in the act of blowing someone's bruises out, Preston Maddoc was upbraiding from old Sinsemilla could escalate into a long bout of vicious hectoring. Although Mother Driscoll shrugged. "What would you stake?" shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told. Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..drained of words, often until his throat grew dry and hot..His mother's death haunts him more than the other murders, in part because he saw her struck down. He. The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs .at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless..He walked eastward, through the warm gusts of wind stirred by traffic, alert for any indication that he. The fallen fence pales clicked and rattled under Micky's feet as she entered the adjoining property.. "Where to?" Colman asked her..The possibility that neither of them noticed the money is slim. By I heir disinterest in the five dollars, they. Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." -Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. We've got plenty to do here." Marie made a face but stayed quiet..useful or when you wanted paramedics. If you were on the road in unknown territory, you could pull. When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth.. "Is it?" Geneva still leaned forward. The slow unsynchronized throbbing of the candle flames cast an. half a mile ahead, at the top of a rise, traffic has come to a complete stop..likes to talk about people he's killed? the way they looked when they died, their last words, if they cried..to hear it..Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her. More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in ~the matter they already had?. THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..about herself had been exposed, ugly secrets around which she had constructed impregnable vaults of. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." disappointment. "I sure did want to be Minnie." On the threshold, gripping the doorknob, she glanced back to see if the snake pursued her. It remained
