a gun under them." For the curtain that was falling away was the backcloth of the stage upon which the dolls had danced. And as the backcloth fell and the strings fell with it, the dolls were dancing on. The dolls were dancing without the strings because there were no strings. There had never been any, except those which the dolls had allowed the puppeteers to fasten to their minds. But those strings had held up the puppeteers, not the dolls, for the puppeteers were falling while the dolls danced on..Adam also had an older sister--to the surprise of the Terrans--who designed navigation equipment for spacecraft at an establishment located inland from the Peninsula, a twin brother who was an architect and, rumored to be getting friendly with a lively redhead from the Mayflower H whom Colman couldn't place, a younger sister who lived with two other teenagers somewhere in Franklin, and a still younger half-brother, not a son of Kath's, who was with their father in Selene. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked..Baldwin is a more believable villain than hero."..It took a second for Colman to realize what Sirocco was talking about. "I say a lot of stuff. Not all of it means anything." At the gap in the broken fence, the girl stopped and her own need or desire, but as though she were eating it on behalf of he who could not share this table. "I told you yesterday. They shot like six hundred thousand volts of electricity through her head?" Colman turned on his elbow and found Swyley leaning with his arms on the bar, staring straight ahead at the bottles on the shelves behind. Colman raised his eyebrows. Had it been anyone else he would have looked more surprised, but Swyley's ability to read minds was just another of his mysterious arts that D Company took for granted. After a few seconds Swyley went on, "They're seducing all of us. That's how they're fighting the war." Colman and Hanlon frowned at each other. Obviously they weren't going to get anywhere without being more direct. Hanlon wiped his palms on his hips. "We, ah... we don't mean to be nosy or anything, but out of curiosity, Dark with clotted blood, the holes no longer oozed.. "Even though he kills old ladies and boys in wheelchairs?". Below, the three flashlights swivel in unison and point due north. Toward Curtis.. "How-how could you justify it?". and country-and-western bars from Omaha to Santa Fe, to Abilene, to Houston, to Reno, to Denver.. Colman hesitated for a split second to let the question ask itself. "So...?". "Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?". The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags.. boy hears voices. He looked across at the couple curiously. "I was wondering what they want with all that stuff. Anyone would think it's about to run out." "No," Micky said. "Cops haven't had one lead in eighteen years." After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already. "And someone wanted the cash," Leilani guessed.. stopped panting.. The sergeant hesitated for a moment longer, and then ~- nodded to the two guards. Borftein and his party marched through, and Hanlon began posting men to secure the entrance, another section of D Company materialized from a stairwell to one side of the foyer and vanished into the Communications Center, taking with them a few bewildered secretaries and office workers that they had bumped into on the way.. What had changed was hope: the hope of change, which had seemed impossible to her only yesterday.. "SDs," Colman said at once. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?". "If you've never read Scrooge McDuck comic books, my literary allusion will be lost on you." She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket. "Used to be. Is it that obvious?". He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. Spit out. "Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his hands on the heavy equipment there. A shuttle's on fire in one of the launch bays." This time, the pacifist didn't smile. "Guess I should have said do the smart thing." Noah raised his eyebrows. "What? You mean . . . you want me to give this bag of money to the cops." "They've already got security," Nanook declared. "And if they're not rich enough already, how is some crazy supposed to help?". As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open

Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit.".shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told.Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice..even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog.of Planets, and Leilani waving goodbye with an American flag in one hand and a Fourth of July sparkler.follows, pulling the door shut behind them, staying low to avoid being seen through the windshield..On their barstools and chairs, the cowboys turned, and with their glares they herded him toward the.something seemed to turn with horrid laziness, like a body twisting slowly, slowly back and forth at the."What's your name, boy?"
