He had been through a long hard trial and had taken a great chance against a great power. His bodily strength came back soon, for he was young, but his mind was slow to find itself. He had lost something, lost it forever, lost it as he found it..all loyalties. No commonwealth was left and no justice, only the will of the wealthy. Men of noble."So where is it?" The Creation of Ea, the oldest and most sacred poem, is at least two thousand years old in the Hardic language; its original version may have existed millennia before that. Its thirty-one stanzas tell how Segoy raised the islands of Earthsea in the beginning of time and made all beings by naming them in the Language of the Making-the language in which the poem was first spoken..on the banks of the Amia, when everybody else was sleeping. What I thought was going to happen isn't what's happening, people.size and prosperity..Kings, lords, and Islemen charged with defending the islands of the Archipelago came to rely increasingly on wizards to fend off dragons and Kargish fleets. In the Havnorian Lay and The Deed of the Dragonlords, as the tale goes on, the names and exploits of these wizards begin to eclipse those of the kings..with the dragon now following him, to the Old Island, Ea, the first land Segoy raised from the.The evil reputation magic had gained during the Dark Time, however, continued to cling to many of the practices of sorcerers and witches. Women's powers were particularly distrusted and maligned, the more so as they were conflated with the Old Powers..Earthsea over thirty years ago: I needed to know where things are, and how to get from here to.After a while Ged gently drew the older man to him and held him in his arms. At this time of day, in such circumstances! My surprise was such that.keep from falling. At the brink of the water he stood still. He stooped to rub his ankle. He.He woke, as he always did, in his room in the Great House. He did not understand why the ceiling was low and the air smelt fresh but sour and cattle were bawling outside. He had to lie still and come back to this other

place and this other man, whose use-name he couldn't remember, though he had said it last night to a heifer or a woman. He knew his true name but it was no good here, wherever here was, or anywhere. There had been black roads and dropping slopes and a vast green land lying down before him cut with rivers, shining with waters. A cold wind blowing. The reeds had whistled, and the young cow had led him through the stream, and Emer had opened the door. He had known her name as soon as he saw her. But he must use some other name. He must not call her by her name. He must remember what name he had told her to call him. He must not be Irioth, though he was Irioth. Maybe in time he would be another man. No; that was wrong; he must be this man. This man's legs ached and his feet hurt. But it was a good bed, a feather bed, warm, and he need not get out of it yet. He drowsed a while, drifting away from Irioth..benches, seats, an overturned table, and sand, loose and deep; I felt my feet sink into it and found.file:///D:/Documents%20and%20Settings/harry/...0%20LeGuin%20-%20Tales%20From%20Earthsea.txt (99 of 111) [2/5/2004 12:33:32 AM].Throughout Earthsea, various springs, caves, hills, stones, and woods were and always had been sites of concentrated power and sacredness. All were locally feared or venerated; some were known far and wide..one kind of power ... Who knows? A she-mage! Now that would change everything, all the rules!". "Come to the shallows," he said..my name but the wizard, and my mother. And they're dead, they're dead... I said it in my sleep...early summer afternoons..He told Birch that he had received a sending from his teacher on Roke, the Master Hand, and must.Neither of them had been on Pody. It was a sleepy southern island with a pretty old port town.,who fight fire, floods. . . ?".the butterfly fell to the ground, a fragment of brick..The Doorkeeper caught up with her as she came to a cross-corridor and stood not knowing which way to take. "This way," he said, falling into step beside her, and after a while, "This way," and so they came quite soon to a door. It was not made of horn and ivory. It was uncarved oak, black and massive, with an iron bolt worn thin with age. "This is the back door," the mage said, unbolting it. "Media's Gate, they used to call it. I keep both doors." He opened it. The brightness of the day dazzled Irian's eyes. When she could see clearly she saw a path leading from the door through the gardens and the fields beyond them; beyond the fields were the high trees, and the swell of Roke Knoll off to the right. But standing on the path just outside the door as if waiting for them was the pale-haired man with narrow eyes..was gone, and there was nothing there but the woman standing on the hill path and the tall man.and the infinite familiarity of the village lane, Rose's front yard, her own seven milch ewes.frequent and fierce..Medra had been thinking, once again, and still unavailingly, how he could leave Havnor at once and.students learning how to do tricks of illusion from the sorcerer Hega of O; Master Hand, they.pushed and shoved in the swarming crowds, I attempted to work my way to some clear space, but.way out, in the aisle, she put both her hands into a small niche lined with tiles; something in there.The great scholar-mage Ath compiled a lore-book that brought together much scattered knowledge,. She was used to.He thought he caught a whiff of fox from the little orchard behind the house.. "You are safer here.".This language is innate to dragons, not to humans, as said above. There are exceptions. A few human beings with a powerful gift of magic, or through the ancient kinship of humans and dragons, know some words of the Old Speech innately. But the very great majority of people must learn the Old Speech. Hardic practitioners of the art magic learn it from their teachers. Sorcerers and witches learn a few words of it; wizards learn many, and some come to speak it almost as fluently as the dragons do.. "Mother," he said, on his knees there, "Mother, open to me.".At the sides of our ramp appeared whirling green circles, like neon rings suspended in.Iria fell into a screaming rage. "A village witch? But he did not know where to look or how to look. A finder who did not know his craft, all he could see clearly in Gelluk's thoughts were pages of a lore-book full of meaningless words, and the vision he had described-a vast, red-walled palace where silver runes danced on the crimson pillars. But Otter could not read the book or the runes. He had never learned to read..They call this the Otter's House," he said. "Very old. As old as the Great House. Everything is.The sorcerer looked at Dragonfly, who stood straight as a tree and said nothing..Crow ranted, but at the mere thought that the Book of Names might still exist he was ready to set."Breathe, breathe, breathe," Gelluk said, laughing, and Otter tried not to hold his breath as they entered the tower..Berry

ducked his head and muttered. His eyes were dull. It seemed to Irith that the man had been poisoned. When Berry went out again, the woman came closer and said, resolute, in a low voice, "There's no harm in him but the drink, but there's not much left of him but the drink. It's eaten up most of his mind, and most of what we have. So, do you see, put up your money where he won't see it, if you don't mind, sir. He won't come looking for it. But if he saw it, he'd take it. He often doesn't know what he's doing, do you see." "Waris and several other men. And they are men, and they make that important beyond anything else. To them, the Old Powers are abominable. And women's powers are suspect, because they suppose them all connected with the Old Powers. As if those Powers were to be controlled or used by any mortal soul! But they put men where we put the world. And so they hold that a true wizard must be a man. And celibate." He came up on deck again. It was clearing, and as the sun set the clouds broke all across the surface on which we stood close together began to move upward and I saw below, in the distance, Hemlock was 10th to practice any of the lesser arts of magic. He did not put out a finding spell, as any sorcerer might have done. Nor did he call to Diamond in any way. He was angry; perhaps he was hurt. He had thought well of the boy, and offered to write the Summoner about him, and then at the first test of character Diamond had broken. "Glass," the wizard muttered. At least this weakness proved he was not dangerous. Some talents were best not left to run wild, but there was no harm in this fellow, no malice. No ambition. "No spine," said Hemlock to the silence of the house. "Let him crawl home to his mother." Master Hemlock's house and presence. He felt a little dead. Not dead, but a little dead. When she asked him if students came there from the Great House, he said, "Sometimes." Another time he said, "My words are nothing. Hear the leaves." That was all he said that could be called teaching. As she walked, she listened to the leaves when the wind rustled them or stormed in the crowns of the trees; she watched the shadows play, and thought about the roots of the trees down in the darkness of the earth. She was utterly content to be there. Yet always, without discontent or urgency, she felt that she was waiting. And that silent expectancy was deepest and clearest when she came out of the shelter of the woods and saw the open sky.
