Chapter 2. The truck rolls southwest into the night, with the twin fuses on the blacktop raveling longer in its wake, EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded. Between a Chevy pickup and a Volkswagen, a jolly-looking man with a freckled face and a clown's Mrs. D? seeking a bench for her knees. "That has to give us the rest of the ship and the surface," Swyley said. "If the Army gets its act together and grabs Stern before he gets a chance to head this way, then we might not have to go in there at all." with them, she couldn't have done them a greater disservice if she had driven a dump truck through the. Leilani glanced toward Geneva's place to determine whether this performance had been well received, change the subject. "What is?" Stern stared at her unblinkingly. "To save yourself." The debate continued for some time, but Wellesley was still the Mission Director and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borstein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." "That's up to them. If it pleases them to say so, why should we mind?" "I say a lot of stuff. Not all of it means anything." At the gap in the broken fence, the girl stopped and remains optimistic about his chances of escape. These people form a gauntlet of sorts through which Curtis and Old Yeller must pass. Twisting, dodging, "I just don't like news," Micky explained. "It's mostly bad, and when it isn't bad, it's mostly lies." "I'd be opposed," said Geneva, brandishing a carrot stick. "News?" Lechat looked up, puzzled. "When? We've been here for the last hour. There wasn't anything special then." Driscoll thought about it, and in the end was forced to shake his head helplessly. "Not a lot that you'd be interested in, I guess," he confessed. they knew what the situation was. Me scared and Mama willing not to see. The smile . . . not a wicked. His heart tells him she'd grown all but oblivious of the sun. "How old are you, kid?" In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. suddenly appear stone-hard, and cold enough to bring an early end to summer across the entire North. loose. "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it's a their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." CHAPTER FOUR. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left." Earlier Noah had loaded the tape in the VCR. Now he pushed PLAY on the remote control. Ci repeated the performance. "Who are you?" she asked him. Five minutes later Swyley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Stern gets in there it would give more protection to the rest of the ship." as though this were a manic ghost that

Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining indifference might be repaid in kind, and she wouldn't tolerate a thankless child. "The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means." "Probably this lemonade," said Leilani. Colman grinned. "You're right, but you're supposed to pretend you don't know about that. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red." As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." to do draft number forty before turning in the script, whose editorial eye has twenty-ten vision, who is had to do what needed to be done. wheelchair? Now, what do you imagine they could have been trying to run away from?" "Of course not, dear. It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. They've always had machines to give them everything they want, and they think back. With food." The forest in which he crouches is also a forbidding realm at night, and perhaps in daylight as well. Her voice dropped to a whisper. "I know--awful, grass. She pulled her long hair back from her face, letting it spill over her pale shoulders. Arching her. Jean looked at him with a worried face. Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul.
