"I have red hair, I have freckles, I am five feet, seven inches tall, and I have brown eyes. All you need do is go to Hidalgo who owns the Mariner's Tavern and ask her who has red hair, is so tall, with such eyes, and she will tell you, 'It is her own darling Amos.' And Hidalgo's word should be proof enough for anybody. Now what do you look like?".. when Amanda walked into my office with her seeds of tragedy and elected me gardener.. all that, even if you don't have to worry about him.. "My dear sir, it is out of consideration for you that I have exposed you only to our lighter forms of entertainment I presume you are referring to something in the nature of a Music Hall, or Vaudeville. I assure you that, since the advent of Universal Education, even the popular taste has become too refined to tolerate the foolishness of sentimental songs and lurid melodrama. Also, please do not use again the expression you have just uttered. I mean the one beginning with the letter D. Our twentieth-century society has grown unaccustomed to language of such violence.. A tiny white ball came through the doorway and bounced off three walls. It moved almost faster than they could follow. It hit Crawford on the arm, then fell to the floor where it gradually skittered to a stop. The hissing died away, and Crawford picked it up. It was lighter than it had been. There was a pinhole drilled in one side. The pinhole was cold when he touched it with his fingers. Startled, thinking he was burned, he stuck his finger in his mouth, then sucked on it absently long after he knew the truth.. around, but it was a damn close thing. Lou was young; so was Cantrell. Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the' ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship's~ computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes

involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected. 'not just hard to believe; it's scary.
