My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. This cramped,."You don't know where you were born?"..It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked-."Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. The answer lay behind a trapdoor in her mind that she had refused to open. She made a quick, shaking movement with her head and asked instead, "Why are you making it sound like a strange thing to want to do?"..Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before.CHAPTER EIGHTEEN.And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. "My brains would be all over the kitchen."..The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through

some mechanism-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..cartons of eggs, blocks of cheese. . . .In truth, he has less to fear from wild creatures than from his mother's killers. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?".The dog watches, head cocked, looking every bit as puzzled as it ought to be..Although he could never again wear a badge, Noah carried in his mind a cop's rope of suspicion, which."It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly..Micky leaned forward from the angled back of the lounge chair. "Leilani?"
