The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit.. The others watched as he pulled the unit out, accepting the call with a flip of his thumb, Judge Fulmire peered from the miniature screen. "Are you alone, Paul?" Fulmire asked without preamble. His voice was clipped and terse.. "The build-up at Canaveral is proceeding on schedule and will be completed before midnight," he informed Sterm at a midday staff meeting in the Columbia District's Government Center. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn.".. provided each of 'em with a room and a boyfriend. He looked at Jay. "I can't see that they've got it all figured out. They can't have." "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?".. character job at Disneyland, but they turned me down." "Leilani Klunk." "Well... no. Why?" "And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurings ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, 'effective as of now.'" He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to.thought and analysis.".. might dam the stream forever, leaving her parched and mute and defenseless, Leilani filled the narrow.and cat-free sanctuary of the care home.. reason to worry about losing her apple pie.. Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie.. Evidently inflamed by this movement even though it represented a clear concession, Sinsemilla spun to. "Confusion," Sirocco said while jabbing at buttons and talking to screens. "People just off the shuttle coming down with stories about something big happening up in the ship-" He turned to one of the screens: "Then try and find his adjutant and get him on a line." Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians.".. supposed to talk about the ETs only among ourselves. again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you." The painter shrugged again. "That's okay. Different people value things differently. You can't tell somebody else when they've had enough to eat." In becoming brothers, they will change each other. The dog might become as easily humiliated and as "I didn't mean that," Driscoll protested, feeling embarrassed. Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower II. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all? Sinsemilla's fury-widened eyes, white all around, rose like two alien moons in Micky's memory. She "Rickets. I know. But you can get vitamin D in tuna, eggs, and dairy products. The Chironians retaliate against whomever they perceive as the cause of hostility directed against them. If the evictions are enforced." "And how about this?" Pernak said. "Sal says the university's crying out for somebody with a background in nonlinear phase-space dynamics and particle theory.. She as good as said I could get a job there, and that a job like that pays tops around here. What do you think of that for a break?"..The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it.."Sure," Driscoll told her. "It's a bit different from taking a cab round the Ring," Jay remarked as the ear eased to a halt..he shouted at Harding. "Fire at any SD's who get in the way. They know we're here now." He turned to the others. "Grab those two and stick with me. You two, stay with Crosby and cover the rear. Okay, let's get the hell out." "Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters.. "Who else would he keep on the payroll?" "We-we never believed that story," Bernard said weakly.. Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears.
