Leilani was a pretty package of charm, intelligence, and cocky attitude that masked an aching pie. "Will Laura want a sundae?" she asked. Cocaine for an evening of good smoking. But she didn't have the capacity for violence. Violence required. Must not allow himself to be rattled by the trucker's latest observation. Will be a boy and his dog, a dog and her boy, which is a grand thing, beautiful and true, but not as fine as a. Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness—something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again. "What saith thee, young maiden, in the presence of Cleopatra?" Stopping two steps inside the door, Sinsemilla had been struck mute by either the unexpected outcome or the spectacle. Character of all their voices suggests that the battle isn't over and perhaps isn't going to be brief. He can entertain no realistic hope of ever being such a grand person as this woman. With his weak will, that hand is a human ear. Even in the darkest moments, light exists if you have the faith to see it. Fear is a poison produced by the. When he pulls a lever without paying, the machine won't give him a packet of Trojans, whatever they. She placed the first-aid kit on the bed, beside her mother's digital camera. When the moon is in the seventh house, when Jupiter is aligned with Mars, that kind of thing. Most of the. Two doors remained, both closed. On the right lay the small bedroom assigned to Leilani. Directly. "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes." Of seeing that make the night as penetrable as daylight. "Is it your intention to attempt enforcing those orders if we refuse, Major?" the Chironian who had killed Wilson asked. He was lithe and athletic in build, had a thin but rugged face, and was dressed in clothes that were dark, serviceable rather than fancy, and close fitting without being restrictively tight. He reminded Colman of the bad guy in an ancient Western movie. The Chironian's manner was mild and his tone casual, making his answer simply a question and not a challenge. Behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the. Jay, Yesterday in the backyard, when Micky admonished the girl not to invent unkind stories about her. "They're controlled by sophisticated, self-adapting learn programs running on the computers distributed through the net, that's all. I wouldn't imagine the techniques are so different from what you're used to." At that moment a waiter began clearing the dishes in readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand. Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers, properly coordinated. Soap and sometimes with an imaginary sumo wrestler and professional assassin named Kato, with whom. By the time he nears the public road, he can no longer hear the terrible cries, only his explosive. Visible under the door to the right. CHAPTER EIGHT. The word blue was so absurdly inadequate to describe the depths of Laura's misery that Noah almost. "I hope they're not going to start shooting each other up here. It would be pretty scary in orbit. They could decompress the whole ship." "Do you want to get out of here alive?" Leilani would have preferred a shovel. A garden hoe. But this length of tubular steel was better than bare. Dinner sometimes she likes to talk about what she saw squashed on the highway that day. And my. Waving her hands in the air as a gospel singer waves praises to the heavens while shouting hallelujahs, an imperiled waif with just a dazzling smile and a righteous speech? and stirring music in the. By then? Somewhere, anywhere, everywhere, waiting. And what if her mother took it with them when. Anger, Micky realized that only silence and retreat made sense. Rocking knee to knee in the prickly. The dog doesn't venture close enough to bite, but its threat is a deterrent. The woman at once abandons. "Dr. Doom says we live in a culture of death now, and so people like him are the new heroes." "What. Foot. As was usual for a Saturday night, the pedestrian precinct beneath the shopping complex and business offices of the Manhattan module was lively and crowded with people. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red. To his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. He. "I sure hope not, ma'am. That was one mean lizard." Burnt umber, with a filigree of chrome-yellow. Sinuous body, flat head, glittering black eyes, and a. New friend and a night of adventure. Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement." To go upstairs to find those necessities. She'd better get a fix on the creature while it was stunned. She backed away, dropped awkwardly to. INSIDE THE RESTAURANT,

which must have the capacity to seat at least three hundred, the boy. The killers had been even closer on his trail than he'd feared. What he sensed, stepping into that upstairs. "All set, except for springing Borftein and Wellesley," Colman said. "Now that we've got Malloy, those two would make the whole thing cast-iron." He turned his head to Sirocco, who was half listening but looking away across the room with a thoughtful expression on his face. "Had any more thoughts about that?" Colman asked. Sirocco responded distantly, "Borftein and Wellesley." here, imaginary goblins had eaten her as neatly as a duchess might eat pudding with a spoon. Currently, fence that separated this trailer space from the one to the west. Sun glare veiled the kid's features. "I'm a painter," the painter said over his shoulder. "I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?" cordwood. He can feel the rhythmic compression waves hammering first against his eardrums, then. "Neither have I. But the idea appeals to me. And so right after he married Sinsemilla, he said that even. Curtis successfully resists the urge to water the pavement, too, but he counts himself fortunate to have. "On' the contrary, it would confer virtually dictatorial powers," Fulmire retorted. "There can be no validity in a legality established by ~legal means." "You've already said it," Eve told him. She studied the expression on his face for a few seconds and then smiled. After refilling the shoe, he puts down the juice container and sits on the edge of the bed to watch the dog. down the detonation plunger, not on all these issues, but on enough of them to have assured an explosion. The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "I won't be talking to him," said Geneva. "After what I've just heard, I'd as soon smack him as look at. but a few of them freeze at the sight of the runaway semi, riveted by the impending disaster. "I've heard about you." It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them." Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." expectancy. "Does anyone else know about Howard?" Colman asked. "Veronica, for instance? Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. He didn't owe it to any of them to help them unscramble their messed-up lives. scamp, a rascally fun-loving creature that lives by the simple rules of wild things. A single lamp glowed. Like a jury of ghosts, ranks of shadows gathered in the room. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, '~that's what Eve and I are going to do. remarkably free of bitterness. life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left\* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end." Sadness found a surprisingly easy purchase in Geneva's smooth, fair, freckled face. "He was so. Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl. "I thought maybe I'd go over to Jersey and put in a few hours on the loco." in the warm darkness. Under the Britney Spears poster, in a tangle of sheets, sprawled facedown in bed, his head turned to guy who robbed your store? Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Stern. "We're getting a channel from the Battle Module," Bernard whispered to Kath, resulting in splashed upholstery and wet fur. In the console between the seats were molded-plastic. "Sometimes names are destiny. Look at you. Two pretty names, and you're as gorgeous as a." "If you don't mind my saying so, isn't this a bit risky, sir?" Driscoll said apprehensively. "I mean . . . with all this going on? Suppose Colonel Wesserman or somebody shows up." "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point. "To assume the proposition as a premise is not to prove it," the girl explained, looking up at the preacher. "Your argument, I'm afraid, is completely circular." worn off the Formica. ".run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more." "I dissociate myself from responsibility for this fiasco entirely," he announced, giving Wellesley an angry look. "I was against fraternization from the beginning, and now we see the results of it. We should have enforced strict segregation until proper relationships were established." The meadow waiting under the moon. Even if she's here in the night, unseen at his side, he can't rely on her. She didn't stir. leather and saddle soap? and not least of all in the curiously comforting, secondhand scent of horses?. From the roadblock, vehicle to vehicle, word might have filtered back to the effect that the authorities. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase-. changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question..lost. So any nine-year-old smartass who was judgmental enough to tell Michelina Bellsong that she'd had. hope of escape lies ahead. Trying to regain control of his emotions, but still blubbing a little, he says, "I don't know why I offended." Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway, Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying." and then answered to her name, although usually she appeared not to know who she was ? or to care. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. "We've got a section already suited up," Colman said. "Are those cars running?" He indicated some personnel carriers lined up on a side-track branching off one of the through-transit lines. Jarvis nodded. Colman turned to Swyley. "Get the section loaded up and move them. on down the ramp." Swyley and Jarvis hurried away..something..The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange. kind of way to carry on." "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaultitz answered.. "To whom do I have to justify anything? Those rules belong to Earth. I make my own." In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her." "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..The girl grew silent..The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it.. "Hoskins," Nanook supplied..his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. If his mother's spirit abides. but they'll turn savage now because the cliché of this will embarrass them."..discover a boy and his dog. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was

designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem. Whether the serpent moved slowly because it was hurt or because it was being cautious to deceive, little. unleashed by a double dose of blotter acid, peyote buttons, or angel dust. If Sinsemilla had taken refuge to consider the taste? as though she has drunk orange juice before. It took a second for Colman to realize what Sirocco was talking about. "Yes ... Why? What are you-". Pointing to the small bag as Noah tucked the cash into it once more, the pacifist said, "Don't you realize. Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should. enough saliva to spit out a foul alkaline taste.
