The changes that the computers had detected were tiny--the merest beginnings of a trend which, if it continued at the present rate, wouldn't approach anything serious for a month or more. With only another three months to go before the ship reached Chiron there was no cause for alarm since the rest of the pump-group had enough design margin to make up the difference even without the backup. But even so, there was little doubt that Merrick would insist on the primary's being stripped down to have its bearings reground, alignment rechecked, and rotor rebalanced again. They had been through that routine twice already in the three months that the main drive had been firing. That meant another week of working in near-zero g and klutzing around in heavy-duty protective suits on the wrong side of the stern radiation shield. Not in the usual sense of planning to stay here forever, but all our planning will have to be geared to that fiction. What we're faced with is not a simple matter of stretching supplies until rescue comes. Stopgap measures are not likely to do us much good. Hie answers that will save us are the long-term ones, the sort of answers a colony would be looking for. About two years from now we're going to have to be in a position to survive with some sort of lifestyle that could support us forever. for Swley to deliver his verdict. And that made it unlikely that Colman would get the transfer into Engineering that he had requested. The job left her untouched. With perfect calm and not even a pause in her movement, she said, "He had the press, I believe." She spun once more and finished in a deep curtsy, then straightened and began stripping off her exercise suit. "I'm going to swim. Will you come with me?" "Ideas . . ." he said, in a slow, deliberate manner, as though each of our situation. If anyone is a commodity here, it's you and Ralston, by virtue of your scarcity. There will. Date: September 23, 1977. writer at all. Was it only my genes? She made it in time to see her shipmates of the last six months gasping soundlessly and spouting blood from all over their faces as they fought to get into their pressure suits. It was a hopeless task to choose which two or three to save in the time she had. She might have done better but for the freakish nature of her struggle to reach them; she was in shock and half believed it was only a nightmare. So she grabbed the nearest, who happened to be Doctor Ralston. He had nearly finished donning his suit; so she slapped his helmet on him and moved to the next one. It was Luther Nakamura, and he was not moving. Worse, he was only half suited. Pragmatically she should have left him and moved on to save the ones who still had a chance. She knew it now, but didn't like it any better than she had liked it then. The next morning I staggered out of bed at 6 A.M. I took a cold shower, shaved, dressed, and put. "I like your shoes," she said. They looked at the floor. Then Jack got down on his hands and knees and looked under the cot. "What are you doing here?" whispered Amos. I drive west, away from the soiled towers of the strip-city. I drive beyond the colstrip pits and into the mountains until the paved highway becomes narrow asphalt and then rutted earth and then only a trace, and the car can go no further.
