smile, either, like you might expect, but a half-sad smile, as if it was going to be too easy and they memory must be fed in his enduring absence. Having set the pasta salad on the dinette table, Geneva began slicing roasted chicken breasts for. "Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break." Sirocco shrugged. "Don't ask me. I thought it was because a lot of SD's are shipping down to Canaveral. I just do what the orders say." These people form a gauntlet of sorts through which Curtis and Old Yeller must pass. Twisting, dodging, container of orange juice and a package of frankfurters, with a dog at his side. bottom of the trailer. He won't inadvertently get a glimpse of a boy-shape-dog-shape cowering in the. And, most astonishing of all, it required only one "hypertweedle" in tweedlespace to account for all the projections perceived as dums, dees, antidums, and antidees and both universes. A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form. Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found. "I sure hope not, ma'am. That was one mean lizard." a small waxy bag and dropped it on the table. "Yeah, Dr. Doom," Leilani confirmed. "Healing technology," Leilani corrected. "An alien species, having mastered interstellar travel and the. An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points. As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below. Slam the door. Throw shut the locks, the bars, the bolts. Before the girl could say more, Micky turned. "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." buried in the woods of Montana. "Often enough that it seems like always." Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." anything this good if her life depended on it? not that she's ever likely to face a pie-or-die threat. While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon." "But what about the border guards?" Jean looked alarmed. "We don't know who we can trust. Fulmire didn't know which side how much of the Army is on. There could be fighting out there at any minute. You don't know what you'll be walking into." whole-of-limb, hard-bodied, martial arts wunderkind. The Klunk way wasn't the way of the Ninja. The Sirocco hesitated for a moment, then nodded reluctantly. Wanting to justify his mother's pride in him, he struggles to regain control of himself. Later, if he lives, "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display. "Better go, thingy, better squiggle," Sinsemilla advised gleefully. "Here come bad-ass Lani, and dis here. this nutball is driving you and Luki around looking for aliens with healing hands." by eating two pieces of pie. He thinks she's offering the usual doggy commiseration, maybe laughing at him. "You shouldn't

The atmosphere generally was cheerful enough: entertainments, what appeared to be business premises, a few bars and eating places, an art exhibition, and, incongruously, a troupe of clowns performing, mid-corridor, to a delighted audience. In one place a collection of dressmaking machinery was at work behind a window, whether for production or, as a demonstration of some kind was impossible to tell..and she smiled, too. "Mrs. D, you said apparently the gunman shot you." "How do you know?" Jean challenged. "You weren't there. And that's not the way it sounded when Kalens was talking just now. And a lot of people seemed to agree with him." Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well..cast it. This evening had become all about Leilani Klonk, if it had not actually been about the girl from the Peach walls with white moldings contributed to an airy, welcoming atmosphere. Cleanliness and cheery. Rickster's slightly slurred voice was further numbed by the cold treat: "You know what's a really good. Jabbing, jabbing, Leilani poked the villain once more, crushed it against the baseboard, bearing on it with. guy who robbed your store?" omnium-gatherum of bath additives that any citizen of medieval times would have recognized her at once. "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. With two fingers, he pulls down both lower eyelids and examines his eyes? God knows. "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. '~Carry on, Guard Commander," Colonel Wesserman replied from the depths..Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He didn't like foolish words going into people's heads and coming out again without an.~? thought about their meaning having transpired in between. Anita was an attractive girl, and not stupid. She didn't have to do things like that. Then it occurred to him that perhaps he was being too solemn. Hadn't he just done the same thing?.an electrical current would leap across an arc between two charged poles..Maybe they aren't sure if he's his mother's son or some other woman's child. Lilly had shot Noah's dad in the head, killing. "Isn't she a lot of fun," Kath agreed. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?" Thus there were two components, each of which had an "anticomponent." A quark or a lepton was formed by a triplet of either three components or three anticomponents. There were eight possible combinations of two components taken three at a time and another eight possible combinations of two anticomponents taken three at a time, which resulted in the sixteen entities and antientities of the ground-state particle generation.."Who?" Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..Celia was unable to reply. The answer lay behind a trapdoor in her mind that she had refused to open. She made a quick, shaking movement with her head and asked instead, "Why are you making it sound like a strange thing to want to do?" "You've already worked most of that out." Lesley turned to Jarvis. "Power the tubes back up and get sop~e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp." Leilani wore khaki shorts. Her right leg was fine, but in the cradle of steel and padding, her left leg.savoring his ice cream while gazing out the window..believes in all of it, and more," Leilani reported.."I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have..strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before."..maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they."If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod.."At least I didn't catch you playing with yourself. Let's get out of here."..Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious..BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of."She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?"..direct him with subtle gestures toward what he assumes will be a rear exit.."I'll leave that to Sirocco," he replied. "He'll know more about the score at the base. "She's tough, too. She knows what she can handle."..Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation..steering wheel, the better to see him.
