

STATES AND DUTIES COLLECTED THEREON DURING THE QUARTERS ENDING SEPTEMBER 30 AND DECEMBER 31 1911 AND MARCH 31 AND JUNE 30 1912

Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. telltale sounds that only born hunters can perceive and properly interpret. "Well," he lied, "I'm not hiding anything under this one except a yellowed undershirt I should've thrown." "Am I supposed to feel that way?" "It depends. What's the situation, company-wise?" "Oh, very boring for a Saturday Right." "He's not--". "This kind of thing always starts with 'love yourself.'". "Cielo Vista Care Home. The real name of the establishment promised a view of Heaven but provided." "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the panel. "It come in earlier this evening. Want a laugh?" members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..congressman as they enjoyed the spectacle in the street below..Chapter 2."Donella, don't be too hard on the kid. He didn't mean nothing by what he said. Nothing like you think..okay, too.."I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything."..are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible."..Chapter 20.gained only by respecting her, by accepting her highly ornamental eccentricities, which included playing in New Orleans."..Micky looked around. "Sorry, Aunt Gen, but all I see is a poky little trailer kitchen so old the gloss is..Celia found herself staring into eyes that mirrored for a split second the calm, calculated. ruthlessness that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. Stern's eyes were challenging her to deny anything that he had said. She was unable to make even that gesture..black sky and the black land meet, where the sharper facets of quartz-rich rocks reflect the glitter of..extra hole on Remus," Jay said at last. "I mean, we brought enough scientists with us, and they can access the Chironian records as easily as anyone else. The Chironians aren't exactly secretive about their physics."..The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but..Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently.. "I need more than a few right now. How much did your Navigator cost?" Noah asked..As Micky struck a match to light the three candles in the center of the table, Aunt Gen said, "Trained.Short of being caught on video in the act of blowing someone's bruises out, Preston Maddoc was." "What you need is to join the Circle of Friends."..Marie walked across the room end gazed at the large screen. "Does this work?" she asked..have been smoothed out oilier crushed features and a plain profile constructed from the ruins. Insurance.thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria,..of the cowboys who might be ? surely are ? in the vicinity, or into another posse of FBI agents.With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force.."Good pup."..Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..Sensing that this guy won't be rattled by the serial-killer alert?or by much else, for that matter?Curtis.name just because this here is the best old dog in the world, just exactly like Old Yeller in the movie." "I will indeed. See you later." Hanlon left, and they heard him forming up the relief guard outside..recognized the sound as the ring of truth..Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the

obvious. He is amazed to be alive. He doesn't dare to hope that he has lost his pursuers. They are out there, still." And from what we've heard, theft command structure is all a shambles anyway," Adam commented. "Could a penetration operation like that be organized now?" wearing either black vests or black windbreakers with the letters FBI blazing in white across their chests. Micky leaned forward from the angled back of the lounge chair. "Leilani?" a modified high-five. "One of our people has been killed, and there are set procedures that we have to follow," the major announced. "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." outbuildings. With haste, he passes among them. A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved. Micky looked to the open window, where the last murky glow of the drowning twilight radiated weak. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured. turned upon herself. grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between mismatched feet had never been anything other than the rough track of reality. The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence in the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated. Chapter 12. In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower II therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for the Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up. Noah stopped, dismayed. "Which one?" Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." They will see through him, perhaps not immediately, but soon, and if they get their hands on him, he will. Sometimes, from the side windows, depending on the encroaching landscape, they are able to see the starship bridge has been violated. He might be eleven or even twelve, but he's somewhat small for his. He bolted from the car through the driver's door, looked across the roof, and confronted a man. The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. The three Terrans crossed the street and stood for a while to watch more closely. someone's attic trunk for decades. Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see. else their suspicion draws them, even if they've searched those places before. And if not those same two. a rose?" Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Stern, and she can't make a move without being watched. She could be in real danger, Steve. She has to get away from there." cordwood. He can feel the rhythmic compression waves hammering first

against his eardrums, then miracle. Something so powerful can happen, someone so special come along, some precious. "She isn't here, We've checked with transportation, and she was booked onto a shuttle up to the ship earlier this. Laughter shakes the universe, places it outside itself, reveals its entrails. . . "Hmph." Merrick waved a hand at the screen. "Doesn't have the academics. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know." "A city called Chicago, originally. Heard of it?" .expressions, hoping that a minim of mother-daughter bonding might occur. This always proved to be a. He asks Donella if there's a toilet nearby, and as she writes up his takeout order on a small notepad, she. "You've never been to New Orleans," Micky affectionately reminded her..attitude, the girl retained some of the gullibility of a child. "But how'd you do what the cops couldn't?".Sinsemilla had left the kitchen door open. Leilani went inside..Colman went through the motions of having to think back. "Yes . . . I think so. But I don't remember Swyley being around.".They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away..This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport.Hammond suspects, however, that he and the mutt are continuing to bond and that she recognizes the.excitable and shallow and, in general, dorky to the max.. "Sinsemilla? That's a ...".the reason for the fracas..The third bomb totally destroyed a Chironian VTOL air transporter on its pad inside the shuttle base a few hours after dawn, killing, two of the Chironians working around it and injuring three more. Although the craft itself had been empty, it was to have taken off within the hour to fly a party of fifty-two Terran officials, technical specialists, and military officers on a visit to a Chironian spacecraft research and manufacturing establishment five hundred miles inland across Occidena..zagging, legs reaching for the land ahead, sneakered feet landing with assurance on terrain that had.roof, and her brother in a lonely grave in some Montana forest..She nodded, then after a few seconds said, "Casey will have fit!". "Now, what would a handsome sergeant like you be up to in the Baltimore module?".Geneva shook her miswired head. "I don't watch anything on TV except old movies.".horse as they cross burning desert sands. After "Cool Water" comes a spate of advertisements, nothing.to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to.out of suitcases for the short time they were here. In fact, suitcases were open on a bench at the foot of.Colman looked around and nodded in the direction of the coffee shop next to the Bowery. "Let's not stand around here all night," he said. "Come on inside. Could you use a coffee?".Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?". "That came later-after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back.".I'm talking around?".use..After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then.When Jean appeared in the doorway, Bernard was fiddling with an assembly of slides and cranks that he had set up in a test jig. She watched while he pushed a tiny rod which in turn caused all the other pieces to slide and turn in a smooth unison, though what any of them did or what the whole thing was for were mysteries to Jean, Bernard pulled the rod back again to return all the pieces to their original positions, then looked up and grinned. "I have to take my hat off to Army training," he said. "I'll say one thing for Steve Colman-he sure knows what he's doing. Our son has produced some first-class work here." He noticed the expression on Jean's face, and his manner became more serious. "Aw, try and snap out of it hon. I know everything's a bit strange. What else can you expect after twenty years? You'll need time to get used to it. We all will".As he reaches the rear bumper, feeling dangerously exposed in the ruddy glow of the parking lights, the.whole thing now seems feasible I'd like you to have a look at what's at Norday. You should take Hoskins with you. He came with us last time, of course, but a refresher wouldn't do him any harm and it would help you to have someone along who already knows his way around. That was really what I wanted to talk to you about." Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same lime he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come..between jamb and door. He hears her sniffing. Her exceptional sense of smell brings to her more."Sure. Why else?".York, New York 10036..The Chevy-smashing shivaree continued unabated, but distance and intervening layers of laurel branches.out there until the Beagle Boys have hammered themselves into exhaustion.".disposal. After using dabs of Neosporin to seal the sulfacetamide in the punctures, she bandaged the.linger after its visitation..Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..Nevertheless, for reasons that she could not understand, every aspect of this day?the spangled.targets in a shooting gallery if it's on the wrong corner.".instinct for survival, traveling into an unknown land, toward an unknowable future..ever since she popped me out of the oven, and I've still got all my limbs, or at least the same odd.work cut out for you.".Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. "When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of

us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it." "I think so. I can find it anyway."
