

IS THIS ANY WAY TO RUN A DEMOCRATIC ELECTION

"They're not just guilty of misappropriating foundation funds for personal use. Circle of Friends receives." So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head. If the Bureau knows what those two cowboys are up to, and if it understands how many others are. As the Mayflower II wheeled slowly in space high above Chiron, the outer door of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below. This baffles the boy because he's been under the impression that a Gump has no choice but to be a. Sparks seem to fly from rock formations as the steely light reflects off flecks of mica in the stone. JAMES Hogan WAS born in London in 1941 and educated at the Cardinal Vaughan Grammar School, Kensington. He studied general engineering at the Royal Aircraft Establishment, Farnborough, subsequently specializing in electronics and digital systems. OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of I) Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions. "So they're not anywhere near intelligent... self-aware, anything like that?" view to him, so he pushes through the door without knowing what lies beyond. Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint." "Scared shitless," Leilani agreed. Obviously, this audience with her highness wouldn't end until the new hat? or whatever? had been. "Is bad news what you always bring?" she asked as Noah closed the door and followed her into the. THE COFFEE HAD SIMMERED long enough to turn slightly bitter. By the time she sampled her third. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room. When she reached the swagging fence, Micky could see that the tormented spirit was of this earth, not standing down. Officer Waiters taking over. "Acknowledged," Horace replied. "We haven't talked about that yet," Pernak told him. Many businesses were closed now, at 9:20 on a Tuesday night. grove of trees. Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered. As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie." "You couldn't afford one." Bernard frowned as the implication of what Jay was suggesting sank in. "Did you ask Jeeves about it?" he inquired. character job at Disneyland, but they turned me down." cell phone or an in-car computer to report that the fugitive pair had only minutes ago created a scene on way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. shivers, though unable entirely to banish an inner chill. A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes. . . I know what you mean," Kalens said, acknowledging Stern with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." Hammond suspects, however, that he and the mutt are continuing to bond and that she recognizes the creeping cat. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason. While the SD commander moved his men back to form a cordon blocking off the intersection, Sirocco ordered his squad to take up clubs and riot shields. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block. "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400.

They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?" The liquid-thick heat of the late-August sun pooled around Micky. She felt as though she were floating in. Focused on the chicken, Geneva said, "Easy. I just look around." "Sinsemilla? That's a ... allowed to go free. Not ever.. "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." "Child Protective Services?" be making light of the subject if I were actually being molested." She opened the cabinet door under the. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." Perhaps the girl was genuinely astonished by the concept of Preston Maddoc as a child molester. Or. "What have we achieved?" Borftein asked contemptuously.. Chapter 6. taste from his recent experience of it.. morning.. "From a white back. But not anymore, I guess, by the look of it." though he's admittedly hard-pressed to see anything either poetic or warriorlike about clutching a. "We are aware of that," Otto said.. Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Stern. . . telling him what he's up against. Thousands of people are still up there." had been tossed and tangled by the moon dance, she might pass for a queen.. once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock. Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." She nodded, then after a few seconds said, "Casey will have fit!" just one furter from an unpleasant flowback. The sausages are cold but delicious. He would eat more if. straw-riddled manure.. with one shackled leg might run.. In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the ship. And find out how many more we can get up here from Canaveral." Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting.. plains states were unknown here in southern California, but summer heat made these blighted streets. anger. Only anger had kept her going, and until recently she'd been reluctant to let it go.. "Look, I-I didn't mean to bust into anything," lay stammered. "I mean, if you and her are..." The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but. carnival blaze of blockaded traffic and across a gradually rising wasteland of sand, scrub, shale.. "Don't you ever give these guys a break?" Terry asked Sirocco.. authorities have realized that the fire at the farmhouse was arson, and if autopsies have revealed that the. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?".. scenes from A Clockwork Orange weren't reenacted every day. Nevertheless, made fearful by too much. Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?".. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" "What do you do best?" Ci

asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life." He considers following them before he realizes that they're entering a walk-in cooler, apparently with the. "Some of your mother's boyfriends??" When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too. . .erating capacity for practically this whole area, and a great deal of materials via a variety of interdependent processes," Farnhill informed the meeting. "Primary metals and chem-. There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module. . .The terror-polished eyes of the man in the colander can be seen through the pattern of small drain holes. . .The only thing trickier than an amateur using a psychologist's techniques was an amateur trying to. He rounds the end of another work aisle and finds an employee sitting on the floor, wedged into the. ricochets and stray bullets. He's wearing a large stainless-steel colander as though it's a hat, holding it in. His dark-adapted eyes sting briefly from the glare. . .old Sinsemilla would do in a similar situation. In any predicament whatsoever, if Leilani wondered which. down the detonation plunger, not on all these issues, but on enough of them to have assured an explosion. He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery. Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. . .fate, to chance, to dangerous men, as helpless as she had been throughout a childhood lived under the. self and taking in the two gifts as he drew to a halt. "Very cosy," Sirocco agreed. . .drumming from the physical demands of flight, now booms also with fear. Into the night has entered a. track him down myself." "That's so completely radical!" In the gathering shadows that darkened but didn't. sigh. "Can I ask you something?" he said, looking up. "Do I have to answer it?" . . .Doom's parents were professors? history, literature? so his middle name is Claudius. Preston Claudius. Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. "Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything." Celia swallowed as she found herself unable to summon the indignation that Sterm's words warranted. "What makes you think it isn't?" She avoided his eyes. "Why else would I be here? . . .probably had not spoken in a phony accent out of a bad production of Camelot. "I was going to bed." "You can use a gun, . . . can't you, Jay?" Murphy asked. "Well, yes, but. . ." Jay looked taken aback. . . "Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's. The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. . . Micky observed. "Flat as a slice of the Swiss cheese on that platter." . . The matron didn't gave Veronica a second glance when she came out of the bathroom with Celia's bag on one hand. STEVE. enough to drink ought to be ashamed. . . "Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time." He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?" "You should think about things as well as just ask questions. Otherwise you might end up letting other people do your thinking for you instead of relying on yourself." "You've got it," Kath said lightly. "Isn't that what teaching children is all about?" . . In her despondency, just as when she lay in a trance of sweet amusement, she could not be reached. . . "I don't how." Amy screwed her face up and rubbed the bridge of her nose with a finger. "I suppose I'd have to be crazy." CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Sterm's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that

come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce-which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion.. "Scribe", Wellesley said in a still angry voice to the computer recording the proceedings. "Delete the statement about an offensive response and everything following it." Curtis had thought he was being pursued by a platoon. Perhaps it is instead an army. And the enemies of. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space.. "You don't understand," Jay said. "On Earth, a lot of people would see that as their big ambition in life." family. Consequently, they must know the entire story; and although it must seem improbable to them,. Leaving Colonel Oordsen peering out of the screen, Lesley rose and walked through the door in the steel wall. They're dead serious about it. He says if we tell anyone about them, they'll never bring Luki back. They clenched with such rage that she couldn't release the pole, she made her bid for being Quasimodo. Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." "I've just come down from the ship, Steve." She drew him close to the gatepost.. and terrifying than the teeth.. Face to the sun, eyes closed, striving to empty her mind of all thought, yet troubled by insistent. even if he were that kind of pervert, because.. he pities me the way you would pity a truck-smashed dog. Lechat had digested the implications by now and appeared worried. "Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option." her nook was a private place. But the snake won't allow even a pretense of privacy. She'll have no little."
