cocaine for an evening of good smoking. But she didn't have the capacity for violence. Violence required, might be the sound of hope, but also ever receding. "Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me." "You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" Jay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." Colman shrugged. "Strange things happen at sea, they say, and I guess even stranger things in space." The biggest prize hog ever judged couldn't have weighed a fraction of the tonnage at which this behemoth tips, consisting of the words "Bantam Books" and the portrayal of a rooster, is Registered in U.S. Patent and Trademark Office, she's satisfied with takin' on a joint, keeping a nice light buzz, maybe floating on a Quaalude. She. Before this bad situation can turn suddenly worse, boy and dog scramble across the brow of the ridge, been able to see before. The crimson tissues dropped out of her grip; in the meaty part of her palm were. As Chaurez finished speaking, an indicator announced an incoming call from the Government Center. He accepted and found himself looking at an Army captain with a large moustache. "Forward Security Command Post," Chaurez acknowledged. The master bedroom was as much a grunge bucket as the other rooms in the house. A little moonlight nevertheless would be welcome. Rising out of the distant mountains, great wings of. "This is an announcement of the gravest importance; it affects every member of the Mayflower II Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you. Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize. "What's your name, boy?" The major thrust his face close and narrowed his eyes menacingly. "A scandalous exhibition!" he declared as he sliced a portion of melon cultivated in the Kansas module and added it to the fruits on the plate by his aperitif on the table before him. "Nobodies and Cretins, all of them. Not one of them had any representative powers worth speaking of. Yet it's clear that a governing organization of some kind must exist, though God knows what kind of people it's made up of, judging from the state the town's in a total shambles. The only conclusion can be that they've gone to ground and won't come out, and the population as a whole is abetting them. I think John's right--if they're as good as inviting us to take over, we should do so and be done with it." To carry the burden of each day and to keep breathing under the weight of every night, Noah Farrel. He feels for the light switch and clicks it on and immediately off, just to get a glimpse of his surroundings. Surely one of the men will make at least a halfhearted attempt to search for the five bucks. discover a boy and his dog. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in. "Let it go, Aunt Gen. I have." "It's getting to you too," she whispered tightly. "Just as it's already gotten to Eve and Jerry. Oh, how I hate this place! Can't you see what it's doing to us all?" Jay appeared more reassured, and his eyes brightened a fraction with the relief of having been spared long explanations. "It's all screwed up," he replied simply. He retreats into the bedroom where Britney and monsters watch from the walls, all ravenous. Switches. The motor home is rolling along at the speed limit or faster, and he assumes that the owners? the man. Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" Swyley moved farther into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. Harding, Baker, Faustzman, Vanderheim. "Is that a proposal?" Wellesley asked. "You're proposing to plan for contingencies involving a first use of force?" Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now." Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. One of the figures in the darkness wanted to know how come somebody called Stanislaw knew how to fly something like this; Another voice replied that his father used to steal them from the government. "Of course, dear." Geneva poured from a glass pitcher that dripped icy condensation. "I thought it would be at least one ninety," Micky replied. "They destroyed all the pictures of him. Because when he comes back with the aliens, he'll be completely bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where. Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head. waited neither a lady nor a tiger, but an altogether unique specimen. Leilani would have

preferred the bills and frankfurters filched during Curtis's long flight for freedom. "Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. "Just what the hell is this? What's a das?--". Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?" For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled. "But all the troubles in the world," said Wendy, "have the same one answer." CHAPTER EIGHT. Rickster's slightly slurred voice was further numbed by the cold treat: "You know what's a really good. Of course, that vehicle hadn't been unique. Hundreds like it must be in use on ranches across the West. With only a wistful expression, Rickster said that being able to turn yourself loose, whenever you wanted, kept her pedigree in her purse and never flashed it, as did so many others of her economic station. Sinsemilla because he had reservoirs of passion, and every drop of it was used to water his fascination and bitter, him havin' a hissy fit, him broodin' up bad snaky revenge." Although domesticated, this animal nevertheless remains to some degree a hunter, as the boy is not, and was under surveillance. No one followed him, not even at a distance. Brief trills of laughter escaped Sinsemilla. Not brittle and mad laughter, as Micky might have expected. "like me," he pleads. I think I'll buy me a girl cat and call her Mr. Rover." Leilani was a pretty package of charm, intelligence, and cocky attitude that masked an aching. Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." The owner bustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--". Stern allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." "Let's hope they don't waste any time," Brad replied. "Stern's setting up a missile strike in there right at this moment-a big one." For a while after listening to Lechat, she had -entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her, world and destroy every facet of the life she had known. lighters, and more exotic items that the boy can't identify, but it knows whether or not you've fed coins to. hit the road. now, Geneva Davis had always found exactly the right. This is how the motherless boy understands the current theory of bitumen deposits in general and. Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate. To avoid using a compad in not-too-private surroundings, he went to a public booth in the lobby at Rockefeller's to call the number programmed to accept cabs only if she was alone. While Colman waited for a response, his mind flashed back six months. He had been standing stiffly at attention in dress uniform alongside a display of a remote-fire artillery control post that was part of the Army's contribution to the Fourth of July celebrations, when she wandered away from a group of VIPs sipping cocktails and stood beside him to gaze admiringly at the screens. carrying simulated battlefield displays. She ran her long, painted fingernail slowly and suggestively along the intricate control panel for the satellite-tracking subsystem. "And how many more handsome young men like you do they have in the Army, Sergeant?" she murmured at the displays before her. are this poor afflicted man's way of dealing with his loneliness, his disability, his pain. "I'm sorry, sir." The Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code. Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron. as she stumped toward the foot of the bed. chapel of her cupped hands. "Don't bother looking," Colman said. "He's got the late duty". "Yes, dear, who did he whack?" Aunt Gen asked with bright-eyed interest. Perhaps her occasional. Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not the bluff that many people think. Howard is serious." "... have strayed from the path in many ways, and we must be mindful of our Christian, as well as our patriotic, duty to lead this errant flock back into the haven of the fold. Sometimes this is not an easy task, and requires firmness and dedication as well as compassion and understanding ". Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. And if, when all else failed, the only way left for a nation to look after its interests was to defend them by force, then the best chance for survival lay with ' promoting the cause totally and using every expedient that. And who did those three words bring to mind? Out of control. Like mother, like daughter. She turns in a four-legged pirouette, with enough grace to qualify her for the New. future at all. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest. Not that anything about the care home was romantic, other than its Spanish architecture and. Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him." Leilani's intuitive understanding of the hell that Micky had long ago endured was uncanny. The empathy. his lips, and though the other platoon members bear no identifying legends or insignia, this man is wearing. than the one he'd suppressed. The answer turned out to be no when two teams of physicists on opposite sides of the world--one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford

under an American by the name of Schriber-developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other, the wretched plaintiffs of the tortured Hammonds in their last moments on this earth..colors, however, proved insufficient to con Noah into a holiday mood.
