

LAST DESCENDANTS FATE OF THE GODS

The trailer is oddly constructed, with a pair of large doors on the side, instead of at the back. An instant thought of it. Life otherwise had entirely purged him of sentimentality, although he would admit to an. GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter..particular specimen happened to be ambitious, if it always gave that extra ten percent, like the hero of Western medicine, which she despised. When she returned home, she would launch a campaign of not paying for it--not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said."Do you figure they might start trouble, chief?" Stanislaw asked, turning his head toward Sirocco."But who decides who works here? Who appoints them to their jobs?" Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?".because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature. Like her.ready." Colman groaned to himself. Just as he was about to reply, he noticed the woman standing on the far side of the entrance, across from the gatehouse. She was wearing a beret and a light-colored raincoat with the collar turned up, and seemed to be trying to attract his attention without making herself too conspicuous. "Oh, Jesus-" He looked at the two. "Look, I need a few minutes. Jay, stay right there." He walked across to the woman and was almost face to face with her before he recognized Veronica, for once looking neither impish nor mischievous..Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples."Oh, sure . . . I'm just saying there doesn't have to be anything to get scared about." "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?"..dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured.."What have we achieved?" Borftein asked contemptuously..He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings.."Ex-sergeant Malloy of the SDs," Swyley said. "He decided he'd had enough and quit over a month ago. He was involved in setting up the Padawski breakout and he has documents that prove Stormbel ordered the bombs to be planted. He wants to go public." Swyley shrugged. "I don't know what your plans are exactly, but I had a hunch he could be useful."..Leilani was gasping, not from exhaustion?she hadn't exerted herself that much?but because she was.Outside: a shriek..off the flashlight. Holds his breath..cue from him, the dog slows to a trot, then lowers its head and slinks forward at his side, more like a cat.thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria.."How about that?" Hanlon shouted delightedly. "The guy did it!"..the situation, ready to strike again..CHAPTER THREE.KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he

remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..CHAPTER TWENTY.Trust. Curtis has no choice now but to put his full faith in the dog. If they are to be free, they will be free."When was it changed, Captain?".Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?".This exhausted silence was the closest thing that Noah knew to peace. A few times in the past, he had in.She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or.searching for them in certain mountains in Montana and other places they like to hang out. So we're."Too bad. How come?".Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer..Bernard frowned uncomprehendingly. "Yes , . Why.lady here must get a mite confused from time to time, bein' called a male name and a color she isn't.".He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring.deception. Perfect poise is the key to survival. "I think I'd have done the same thing," Otto told him.. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Sterm said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?".The room is small. One queen-size bed with a minimum of walk-around space. Built-in nightstands, a."Does the little orange lady like the dark out?". Rickster asked..Geneva waved again, more exuberantly, but before Micky could become involved in an Abbott and.Honda and out of sight..Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws..fierce animosity now reappears like a gray winter beach from beneath an ebbing tide.. "Isn't she a lot of fun," Kath agreed. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?".Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division..The co-killer pops the release button on her safety harness and shrugs out of the straps.. "Yeah, I remember now..".Pernak glanced at Eve for a moment. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny..". "They weren't," Jay protested. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want,

and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out." "Probably not much of anything," Leilani said, without a pause. "Except in having fun and getting through. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence..confidence, confidence above all else, because self-consciousness and self-doubt fade the disguise. He. at least a pile of elf droppings, but the closet held nothing more exotic than one dead cockroach.. "Hell is spending eternity as the hero in a Bobby Zoon flick." The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment.. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only.. And? chuddaboom! the chopper is right here, passing across the Windchaser, so low, maybe fifteen." "Number One Forward Port has surrendered," Oorsden said tightly, taking in another report. "The firing has stopped there. Nickolson is leading his men out, including his reserve. We have no choice.".. An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points.. "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stair to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. Colman ignored the remark. "Just think about it," he muttered. "For your own sake.".. Noah stopped, dismayed. "Which one?".. As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?".. CHAPTER TWENTY-EIGHT. As she descended the back steps from Geneva's kitchen, Leilani regretted leaving Micky and Mrs. D so. Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun,

or send them away to be slaughtered by the thousands defending other people's obsessions. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently.."It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..because they've lost a job, or just because.
