Change is inevitable; variation from individual to individual is certain. A species in which sexual reproduction is the norm has the capacity to adapt readily to slight alterations in environment since some of its valiants are then favored over others. Indeed, a species can, through sexual reproduction, split with relative ease into two or more species that will take advantage of somewhat different niches in the environment. Bat there are other reasons. Critical judgments are so complex (and take place in such a complicated context), the vocabulary of praise and blame available in English is so vague, so fluid, and so constantly shifting, and the physical space allowed is so small that critics welcome any way of expressing judgments that will be both precise and compact. If vivid be added thereto, fine? what else is good style? Hence critics, whenever possible, express their judgments in figurative language. New York Harbor, November 4, 1872? a cold, blustery day. A two-masted ship rides at anchor; on her stern is lettered: Mary Celeste. Smith advances the time control. A flicker of darkness, light again, and the ship is gone. He turns back again until he finds it standing out under light canvas past Sandy Hook. Manipulating time and space controls at once, he follows it eastward through a nickering of storm and sun? loses it, finds it again, counting days as he goes. When the gag came off, the story came out, and the part of the story the jailor had slept through the grey man could guess for himself. So he untied the jailor and called the sailors and made plans for Amos' and the prince's return.
