For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth.. "It's a pretty house," Hanlon said after another short silence..He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?".submission.. "If you're going to lose anyway, you might as well win," Swyley replied. "If you win the wrong way, you lose, and if you lose either way, you lose. So why not enjoy it?".which is probably something more psychologically complex, as before..Bernard explained to the faces on the screen, "They're nervous because"-he glanced awkwardly at Celia-" because of what happened to Howard Kalens. "You'd be welcome to come too if you want," Rastus said.. "Sentry detail, detach to . . . post!" Sirocco shouted. PFC Driscoll stepped one pace backward from the end of the by-this-time-diminished file, turned ninety degrees to the right, and stepped back again to come to attention with his back to the wall by the entrance to a smaller side corridor. "Parade . . . rest!" Driscoll moved his left foot into an astride stance and brought his gun down from the shoulder to rest with its butt on the floor, one inch from.Veronica laughed. There won't be anything more risky than maybe a few daskrends showing up..".Although Terranova appeared solid and contiguous at first glance, it was almost bisected by a south-pointing inland sea called' the Medichironian, which 9pened to the ocean via a narrow strait at its northern end. A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west..Merrick drew a long breath, and his expression became grave. "Mmm Walters. That brings me to the other thing I have to tell you," he said in a heavy voice. "Officer Walters is no longer with us. He and his family disappeared from Cordova Village two days ago and have not been 'heard of since. He failed to report for duty yesterday. We must assume that he has absconded. He shook his head sadly. "Disappointing, Fallows, most disappointing. I credited him with more character..".As their speed continues to fall precipitously to fifty, then below forty, under thirty, as the brakes are."Why?" a girl in a pink jacket asked..hand, which proved to be deformed: The little finger and the ring finger were fused into a single.Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away..".Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. , "Yes, Matt?" The others looked toward Sterm curiously..Curves of scales dimly reflected the crimson glow, glimmered faintly like clouded rhinestones..The brow of the cab gleams as white as skull bone. One loose corner of black canvas flaps like

the. Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" "You're not suggesting there'll be a fight, are you?" Paula said. He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be. OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of I) Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions. Beyond the window, the wounded day left an arterial stain across the western sky, pulling over itself. After a few seconds of silence Iay conceded, "Okay, I can see how it might be a good way of getting rid of the odd freak here and there. But what do you do when a whole bunch of them get together?" Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. Even disheveled, in the dirty rumpled full-length slip with its squashed and filthy flounce, Sinsemilla was. Stern nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaulitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?" "Have you ever seen a really good dog act, Ms. Tavenall?" Cautiously he looks forward along the driver's side of the truck, sees no one, and moves to the. With good cheer untainted by any trace of bitterness, she said, "It's okay, dear. "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows. He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness..if it is. Someone's got to remember, you know. They're most likely fast approaching from the other side of the vehicle..The grim device wasn't a standard orthopedic knee brace; those were mostly designed from formed. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. "Would you feel better if I said I haven't figured it out yet either?" .make the swap. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse." "Of course it is.", Jay sighed wearily. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly.."Really?' Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman.
