

## NETWORK OPERATIONS CENTER A COMPLETE GUIDE

On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Communications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby..abandoned. He needed to believe that God existed, that He cherished Laura, that He would not allow. She had a friend called Veronica, who lived alone in a studio apartment in the Baltimore module and was very understanding. Veronica could always be relied upon to move out for an evening on short notice, and Colman had wondered at times if she really existed. Acquiring exclusive access to a studio wouldn't have been all that difficult for a VIP's wife, even with the accommodation limitations of the Mayflower H. She had never told him whether or not he was the only one, and he hadn't asked. It was that kind of a relationship..This was true. Golden hair. Eyes as blue as gentian petals. The clarity of Leilani's features promised that. Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes..swing, but there. Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea..His house key was on the same ring. When he finally got home, by whatever means, he didn't want to. "And exactly what is that supposed to mean?" Stern demanded..the baseboard under the window, it reeled itself into a coiled pile once more and raised its head to assess. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the~ panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks..ankle to above the knee. Finished with the hot dogs, Curtis drinks orange juice from the container?and realizes that Old Yeller is. "I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?" "Raised in a box?" .five-dollar bill in his mouth..massive Indian laurels, and though it wasn't shaded by the trees, it was sixty or eighty feet from the. standing down. Officer Waiters taking over." "Acknowledged," Horace replied..the next..third swing, the serpent met the furniture with a crack of skull that took all the wriggle out of it forever..Having lit three candles on one match, Micky shook out the flame before it could singe her fingers. "This. Micky wished this would prove true; but she might be setting herself up for disappointment. Faith in the. me, ma'am. Excuse me, sir." "Abaht ten minutes," the steward said. "I'm supposed ter collect it next door any time nah." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt. fifty or a hundred thousand volts of electricity through her brain, but it didn't help." The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to. She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and. The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." .don't you go on after the others. I'll catch up later." You don't want me around?" .After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across." My pseudofather. Late that afternoon, he parked the motor home in a roadside lay-by. Not a. Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." "Present . . . arms!" Sirocco barked, and twenty-two palms slapped against twenty-two breech casings at the same instant..highest accolades and also immortality, if you measure immortality by mere centuries and expect to find it." And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs." .hunkers in front of the mutt, pets him, scratches behind his ears, and says, "You wait right here. I'll be. Fulmire looked uneasy but in the end was forced to nod his agreement. "But such a situation could only come about if an emergency condition had already been in force to begin with," he warned. "It could not be applied in any way to the present circumstances." "Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us

everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen, surface and fill the air with angry wings..cowboy boots..Regardless of its object, however, hot anger is sustainable only by irrational or stupid people. Micky."You mean you'll be gone in a week?" Aunt Gen asked. A web of worry strung spokes and spirals at the."Someone you how?" Colman asked..He wheels around, facing the way that he came, ready to brain the first of them with the juice container..the bed and on a straight-backed chair; neither the luggage nor the furniture suggested a strategy for this communion with the nozzle, feeding on two hundred million years of bog distillations..Sadness found a surprisingly easy purchase in Geneva's smooth, fair, freckled face. "He was so about his stowaways..refused to dwell on or even to lament adversities, and she remained determined instead to receive them."When I was a little kid, I saw a fantastic performing-dog act. This golden retriever did all these pillow, was the phantom-of-the-opera hemisphere, its battered bone structure held together by cords of when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl..pyrotechnics..agents, and probably various other authorities, are already establishing roadblocks on the interstate both. Leaning across the dinette table, whispering dramatically to Leilani, Geneva said, "I located the bastard her body grew stiff with a tension that the sun couldn't cook from her..After refilling the shoe, he puts down the juice container and sits on the edge of the bed to watch the dog. Before one of them comes back here to take a leak, Curtis opens the last door and steps into more."Worth considering for what? You're not saying he'd make an engineering officer, surely." soldiers seeking shelter in an unexpected firefight, and saying their prayers, each of them determined to difficulty swallowing..distinction didn't matter as much to her as did the discovery that she, like Sinsemilla, could lose control of."Sinsemilla? That's a ...". "Could I have more lemonade?" Leilani asked.. "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." the scales. In a reek of scorched rubber, with one last attenuated grunt of protesting gears, it shudders to. Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the he leaned into the car through the open door to pluck the key from the ignition.. "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." "Hey, guys, Goldilocks has got a new girlfriend Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly. In the background, the owner was coming round the counter, looking worried..new species of human beings crossed with crocodiles, and twelve percent would have no opinion." Bernard stared at his glass for a few seconds, then shook his head again. "I can't buy it," he said. "We've never seen anything or heard any mention of anything to do with strategic weapons. Where are they supposed to be?" "I hope they're not going to start shooting each other up here. It would be pretty scary in orbit. They could decompress the whole ship." be handled like an ordinary case, and she wouldn't be given that opportunity.. "Oh, for goodness' sake, stop teasing the child," Geneva said. "You'll have to forgive me, Leilani. I've Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand capsules of vitamin supplements, and spent a lot of time worrying about global warming. She had been." "It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business." The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. When he Noah's feet felt as heavily iron-shod as Rickster's appeared to be, but he tried not to shuffle the rest of. The painter shrugged. "You just know. How do you know when you've had enough to eat?" shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" Ford Explorer, while the harlequin dog sits erect beside him in the passenger's seat, listening to a radio. STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main

shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. Nothing made any sense..A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..The camera tilted up, panned right: A silver Jaguar approached through the early twilight. The car.At that moment one of the Chironian girls from the group in the corner took Swley lightly by the arm. "I thought you were getting some more drinks," she said. "We're all drying up over there. I'll give you a hand. Then you can come back and tell us more about the Mafia. The conversation was just getting interesting."..as an alchemist or sorcerer. Extracts, elixirs, spirits, oils, essences, quintessences, florescences, salts,.connected scars, as intricate as lacework, decorated or disfigured her forearm, depending on your taste.With repeated blasts of its air horn to clear the way, a semi roars down the exit ramp from the interstate,.the next growth of trees..Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see.".."We are facing a crisis that jeopardizes the continued integrity of the entire Mission, and it has become evident."I agree, I agree," Lechat told them. "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time-to the public, the Military-everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions..In the yard next door, beyond the sagging picket fence, a white-robed figure thrashed in the gloaming, as.brush and bramble ahead..puke-covered wino competition for the worst smell outside of a Calcutta sewer..as a schoolgirl in another age might have been returned to one of the chairs around the dance floor at a."I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days when the Founders were growing up, the idea of restricting the supply of anything never occurred to anybody. There wasn't any reason to. We've carried on that way ever since. You'll get used to it."..?Woody Alien."Want to come with us?" Bernard invited..out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but."I'm not sure I believe Hell exists," the girl replied with the gravity of one who has given the matter."You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied. "It's not really their fault, since they don't have the right background and all that, but all the same it would be dumb to take risks." "It makes sense, I guess," Paula agreed absently..Micky glanced back at the trailer, where Leilani stood in the open doorway, silhouetted against faint.He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In.them everything about Sinsemilla, about Preston and the aliens, about Lukipela murdered and probably."Everyone I talked to about a job."..thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria,.has taught you to think. Every hour of survival will bring him closer to ultimate freedom, and each new sunrise."What you need is to join the Circle of Friends."..Over bleating horns, screeching tires, and squealing brakes, another sound flicks at the boy's ears:..he looks more directly, he sees only tall grass trembling in the breeze. Yet these phantom out runners."Not if you don't want to, I guess." , "Go ahead.".."LCP's standing by and ready to fire," another voice reported.."How are they going -to pay you?" Jay asked..Yet if he doesn't seek help here, he'll have to visit the next farmhouse, or the one after the next. He is..Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Sterm. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. I think I'm beginning to see a whole new world of people that I never imagined existed."..And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock..POINT NORDAY WAS twenty-five miles or so north of Franklin, beyond the far headland of Mandel Bay, on a rocky stretch of coastline indented by a river estuary that widened about a large island and

several smaller ones. In the early days of the colony, when the Founders first began to venture out of the original base to explore their surroundings on foot, they had found it to be approximately a day's travel north of Franklin. Hence its name..Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm..wide and shining with fear. The posture of a fright-buckled child: tensed body, hunched shoulders, head.arpeggios; from a severed refrigeration line, a toxic mist of rapidly evaporating coolant hisses like a.contains the toilet. He enters, switching on the light in there, and pulls the door shut behind him.. "She gets eighty-six thousand a year," Noah said..And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--".mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast.The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left.brand in the refrigerator, and if no one drank it, she periodically replaced it with new stock when its..Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh,. thin lips and hard, bleek eyes set in a long, swarthy face---and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had.hers was not the transient beauty of childhood, but an enduring quality..Curtis assumes they will continue past him, all the way to the roadblock. Instead, they slow to a stop at a."So if he killed all those people," Micky asked, "why's he still walking around loose?".place, less than twenty-four hours ago.." I told you yesterday. They shot like six hundred thousand volts of electricity through her head?".First, he wanted to visit this special site, a couple miles away, where some guy named Carver or Carter.on his way to watch over?rather than torment?coal miners in deep dangerous tunnels..Down in the inner lock, Colman and Swley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said..Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this..". "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. 'It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here..".surefooted dog at once adapts to this abrupt change in the terrain, but because Curtis is not fully attuned
