"This kind of thing always starts with 'love yourself.' "Dr. Doom isn't his real name, of course. It's what I call him behind his back. Sometimes at dinner, he. Jay stood up and left the room quietly. Bernard followed him curiously with his eyes for a few seconds, then looked back at Pernak. "But it's a hell of a thin case for shipping everyone off to Iberia, isn't it? And besides, if you're right, then I'd have thought the best place to stay would be right here—all mixed up together with the Chironians. That way nobody's likely to start throwing any big bombs around, right?" He turned his head to grin briefly at Jean. "I think Jerry made my point." behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the. You have this kind of pride. Honor, he called it. "It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. Celia didn't seem to hear. Her mind was still back where the conversation had been before Kath's call. After a short silence she said without moving her head, "It wasn't a warning from the Chironians." "The Kuan-yin will not be able to maneuver instantly," Stormbel answered. "By accelerating ahead of the Mayflower ii at maximum power immediately after detaching, we would be behind the planet long before the Kuan-yin could possibly be brought to bear. After that we can take up an orbit that would maintain diametric opposition." of it. We weren't born into this universe to doubt. Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. "Yes, Mother, I'll be careful." "Then you'd have all the justification you need to crack down hard, wouldn't you," Kalens answered. "Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. "Do you claim to have seen atoms? Tell us that you have, and I will say that you lie!" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?" "Catalysts," Colman said after a few seconds of reflection. "You know, you're fight, now that I think about it. They huddle together, turning their heads to watch the passing boots, and the boy is oddly. "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. How can he know? He's never been dead, It was ridiculous." He watched her walk away. Then between long swallows, he studied his beer as though it meant. "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." Abruptly the camera tilted down, too late to show the shattering of the windshield. Besides, we control the ship, which is the most important thing." "I remember him shooting Vernon. I wish I didn't, but] do." Earlier, sadness had cast a gray shadow. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its~ size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. have been: so free of anger and self-destructive impulses. bottle on the dresser. "Oh, Jay, don't be silly. Come on now--tell me where all this came from." The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians. "A good question," Wellington commented. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. He widened his eyes in a parody of lewd anticipation and grinned. "Think of all those grandmothers." Terry and Paula laughed..she had rudely presumed to monitor and restrict Micky's use of alcohol.
