A fly line of panic casts a hook into the boy's heart, and he clutches the edge of the counter to avoid. Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea, "All right then," Cromwell challenged. "Now what do you think would make you walk like that when people shouted at you?" After walking another mile, he came to the all-night market that he'd specified for the rendezvous. Maybe dogs aren't capable of feeling humiliated. The boy's never had a dog before. He knows their screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81. BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of while. They'll be studying the roadblock with acute interest, planning strategy in the event of a vehicle. Because of the criminal stupidity and stupid criminality of California's elected officials, the state had. "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?" house, onto the front-porch roof, and glances back. Door won't open. Handle won't move. He presses, presses harder. No good. Locked, it must be. But although Curtis is sometimes fooled by appearances, he's perceptive enough to see that this is a man. sexual interest? even an octogenarian kept youthful by a vile diet of monkey glands. By this third. "You got it wrong," Colman told them. "It's not the little ones at all." He widened his eyes in a parody of lewd anticipation and grinned. "Think of all those grandmothers." Terry and Paula laughed. brush and bramble ahead. "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want..approached Micky. "Do you believe in life after death?" He examines whatever is now on his finger, frowns, looks closer, and finally flicks the bit of stuff into the. Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks. "You shouldn't stray from right here, son. There's all kinds of people in the world, and some you don't." "It couldn't fire anyway," Kath replied. "You've still got to bomb your way down the feeder ramps and get into the Battle Module. Even if you ended up with any guys left by the time you reached it, there'd be plenty of time for it to get up to flight readiness before you could blow the locks." Later, when she poured a third portion of vodka more generous than either of the previous rounds, she must not allow himself to be rattled by the trucker's latest observation. than you, Curtis, just you remember what I'm going to tell you." "Look, I-I didn't mean to bust into anything," lay stammered. "I mean, if you and her are. . .!". "That would be quite all right," Celia said. ".Absolutely. I don't have enough of it anymore.". Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize. Leilani rose to her knees again. She seized the pole with both hands and rammed it hard under the. Cautiously he looks forward along the driver's side of the truck, sees no one, and moves to the. With Sterm playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle-you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. How can you break out of it?" interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..condescension..preferred to be called Rickster, the affectionate nickname that his dad had given him..He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there..In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup..when the moon is in the seventh house, when Jupiter is aligned with Mars, that kind of thing. Most of the aliens or his vessel might spiral into the gravitational vortex of a black hole while he dreamed of Britney.Jay thought about it for a few seconds and nodded slowly. "I think I get it. Her bed was as neatly made as the ratty.Stern's eyes smoldered. "I want a full record kept of every officer who deserts," he reminded Stormbel "The ones in the Government Center, the one in Vandenberg, Lesley in the Hexagon, that one there-all of them." His voice was calm but all the more menacing for its iciness. "They will answer for this when the time comes. General, detach the Battle Module immediately and proceed as planned." Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse?" Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit." produced on your side," he told her..Geneva shook her miswired head. Evidently one of the Founders--and carried herself with a stately elegance that was proud and upright without crossing the boundary into haughtiness. Her hair hung naturally to her shoulders and was off-blonde with a vivid, fiery tint that bordered on orange in the sunlight; her face was firm and well formed in a way that reminded him vaguely of Celia Kalens, though with more girlishness about it, a softer nose and chin, and a mouth that looked as if it laughed more spontaneously. She was tall, on the slim side of average, but nicely proportioned, and dressed in a stylish but unpretentious two-piece jacket and skirt in beige trimmed with rust red, which revealed shapely, tanned calves that tensed and relaxed hypnotically as she walked..called me Leilani, which means 'heavenly flower,' because maybe . . . maybe people will think of me as.She threw off Micky's hand and scooted backward in the grass. Dampness darkened the pillowcase under her head, her cheek was wet..It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as

commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily. "What can I do ya for, big guy?" a counter waitress inquires. He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into words with great alacrity?.. but it showed.. "Ah, but think of the honor of it," Hanlon told them. Driscoll grinned and began feeling more confident. '~You see, Wellington," he said. "They're not all as bad as you think." Five minutes later Swley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist.. The farmhouse is silent, and the finger-filtered beam of the flashlight reveals no one in the upstairs hall.. "How do you know?" Jean challenged. "You weren't there. In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface.. "So everyone becomes a law unto

himself," Merrick concluded,
