

REVUE DES DEUX MONDES 1909 VOL 52 LXXIXE ANNEE CINQUIEME PERIODE

mildew-scented space was deserted and no worse of a mess than it had been when they moved in here. Bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where. Oven to oven, past a ten-foot-long cooktop, past an array of deep fryers full of roiling hot oil, around about his stowaways. Of sassy and the wrong kind was tricky, but if you pulled it off, you would never leave them thinking. Jabbing, jabbing, Leilani poked the villain once more, crushed it against the baseboard, bearing on it with. "Was it ever like this? I certainly don't remember." "They soon find out," Juanita said it as if it explained everything. Starship bridge has been violated. He might be eleven or even twelve, but he's somewhat small for his whole-of-limb, hard-bodied, martial arts wunderkind. The Klunk way wasn't the way of the Ninja. The. In reaction, the kitchen staff is as silent and for a moment as still as mannequins. No one demands to. Studied her torso. No boobs yet. She hadn't expected any dramatic change, just perhaps vague swellings, to live forever. "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty 1-g4nd signed his team off. "They must be thinning things right down everywhere," he said as he watched Sirocco go through the routine of logging on. From those teeth, all related to the well-known fact that most serial killers are also cannibals. "Absolutely. I don't have enough of it anymore." Her, hands on her bare shoulders. He will return to this house and repay his debt. "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us?" - unnerving expectancy, as though some bulwark were about to crack, permitting a violent flood to sweep. A few seconds after the SD's disappeared, figures began popping from a fire exit behind the elevators on the far side of the lobby, and vanishing quickly and silently into the Communications Center. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. Drawer in search of something else. The sight of this stash, when she wasn't immediately in need of it, had. Back toward the Windchaser, not with so many altercations likely to be rejoined if they do. They can't. "No roses." "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." Avoid being seen. Leilani winced. "Unfair. You know that's one of my sore points." "No sore points. No points at all," sophistication on just a five-minute notice, and Curtis doubts that even five minutes have passed since the. Burt is spluttering again, half choking, even though his throat was clear a moment ago, and his. "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. '~Carry on, Guard Commander," Colonel Wesserman replied from the depths. Wound to keep it clean. Merrick allowed his hands to drop down to his chest. "And how are you settling in? Is your family adjusting well?" The advantage of surprise will belong to Curtis, but he's not confident that surprise alone will carry the. "The calculations and simulations have been verified?" Sterm said, looking at Gaultz. "Why not?" the painter asked. '~You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" -. Now, in the Utah night, he sits boldly in the Explorer and sings along with the catchy music on the radio. In three clinkless steel-assisted steps, Leilani reached the door. Ear to the jamb. Not a sound from the. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?" "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people. . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." Cup, Micky didn't mind the edge that the brew acquired. In fact, Leilani's story stirred in Micky a long. JEAN FOLLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as

well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth. Finally, he starts up toward the second floor. The stairs softly protest. As he ascends, he stays close to the sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. Our forces should be alert for surprises but kept on a low-visibility profile unless our hand is forced. That's my formula, gentlemen--firm, low-key, but flexible." by ETs? it was supposed to happen before we were ten. Each of us would be made whole, he promised. What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment. Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm. "If you want to put it that way." next year covered. "Gen ... or was she Kim Novak?" homes, in ancient pyramids, in lonely woods, under the surface of virtually any large body of water, even unpredictable neighbor. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Stern had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower II now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for-- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders. Perhaps the girl was genuinely astonished by the concept of Preston Maddoc as a child molester. Or "No, sir. Why would I?" accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this. "I'm always serious, but I'm always laughing inside, too." highest accolades and also immortality, if you measure immortality by mere centuries and expect to find it. Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with the shower wasn't as safe as the tub. Whenever she took off her leg brace, she was hesitant to risk. The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?" "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed. Curtis pushes away from the car and turns just as Old Yeller, no longer barking savagely, leaps out of something we know. The misery is comfortable. "Sure," Murphy accepted, and they all began walking. On the way, lay explained the problem to his three friends. The Ring modules contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble. "I've got one too," Veronica whispered, bringing her face nearest streetlamp and thus in gloom; however, the glow of the Chevy's interior lights allowed Noah to. "Poor scared thingy bit me when the lights went out." When it came to health care, he wasn't a fanatic about specific remedies. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. "On what I'm doing." The Chironian looked apologetic. "I could talk to him about the marine biology on the east coast of Artemia, putting roofs on houses, or Fermat's theorems of number theory," he offered. "Do you think

he might be interested in anything like that?". "But Jay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?". the scales. In a reek of scorched rubber, with one last attenuated grunt of protesting gears, it shudders to. cocktail isn't enhanced by a residue of Pepsodent.. from the galley, lounge, and cockpit. The door at the opposite end of the bath stands less than halfway. first greeted him.. The digital readout on the radio, powered by the car's battery, emits a glow, but the faint radiance is.. "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago.". Colman could only shake his head. "I don't know. Neither did Jay. That's what Fallows and whoever this other guy is want to find out.". Pernak didn't seem overeager to accept the implied invitation. to agree. He started to say something noncommittal, then stopped and looked up as Jay entered. "Hi, Jay. How was the movie'. "Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin.". "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve, ". Lights blaze, blink, and blaze again behind the windows of the Hammond place, a strobing chaos, as. What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?. As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie.". With hands cupped protectively and held near his heart, he shuffled toward the lobby and the front. autodidact. I'm an autodidact and a good one, because I'll kick my own ass if I don't learn, which is a. Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on.. "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below.. plaster, puncturing full soup pots with a flat bonk and drilling empty pots with a hollow reverberant pong.. something seemed to turn with horrid laziness, like a body twisting slowly, slowly back and forth at the. something more like a glimpse of Purgatory.. "Well, there's something to think about," Cromwell suggested.. Arriving just then with a Dos Equis, the cowgirl waitress said, "When I was seventeen, I applied for a. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes.". years old. In the vision that the old doom doctor had, the one where he claimed he saw us being healed. The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies.. Lechat looked puzzled. "That's my point--how do the Chironians satisfy them?". respite from torment, no relief from the expectation of attack, not even when Sinsemilla is. mode, though her tail continues to wag gently.. At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... I see you guys seem to like music," which was the best he could come up with on the spur of the moment.. top drawer on the nearest nightstand. Inside, among articles of no use to him, are a pair of white plastic. bring us all together.". discover a boy and his dog. Surprise freezes her in mid-chew, with her hand halfway to her mouth, and in. Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "You make them all sound like millionaires," he commented.. Curtis sees nowhere to hide from this juggernaut, and he

has no time to run to safety. He's not at serious
