

SECURITY SERVICE A CLEAR AND CONCISE REFERENCE

"We had a back-up pilot, of course. You may be surprised to learn that it wasn't me. It was Dorothy Cantrell, and she's dead. Now I know what everything does on this board, and I can cope with most of it easily. What I don't know, I could learn. Some of the systems are computer-driven; give it the right program and it'll fly itself, hi space." She looked longingly at the controls, and Crawford realized that, like Weinstein, she didn't relish giving up the fun of flying to boss a gang of explorers. She was a former test pilot, and above all things she loved flying. She patted an array of hand controls on her right side. There were more like them on the left. As a historian, he felt he could not let such a moment slip by unobserved. Silly, but there it was. He had to be out there, watch it with his own eyes. It didn't matter if he never lived to tell about it, he must record it. "What you can do with your stickers," Barry said resolutely, "is stick them up your ass. Your asses, me one hour to produce a full report justifying the project and went storming back up to the executive. figure a way out of this thing. Let them handle it." Tucking the license into his ID folder, he felt like a complete charlatan, a nobody pretending to be a somebody. If he'd scored in the first percentile, he'd have been issued this license the same as if he'd scored in the tenth. And he knew with a priori certainty that he hadn't done that well. The most he'd hoped for was another seven points, just enough to top him over the edge, into the sixth percentile. Instead he'd had dumb luck. "That's where you're wrong. We'll survive." Sometimes the repetition of what we have just said will suggest a new meaning or possibilities of meaning we did not at first suppose to be there. You won't get any takers, though we appreciate the fact that you came. It's nice to know we weren't forgotten." She said it with total assurance, and the others were nodding. Singh was uncomfortably aware that the idea of a rescue mission had died out only a few years after the initial tragedy. He and his ship were here now only to explore. "That's really sick," Stella says. Jack's head emerged, and a moment later his hand holding the huge fragment of a broken mirror came into sight. They had little trouble finding where the matthews came from. They found dozens of twenty-centimeter lumps on the sides of the large derricks. They evidently grew from them like tumors and were released when they were ripe. What they were for was another matter. As well as they could discover, the matthews simply crawled in a straight line until their power ran out. If they were wound up again, they would crawl farther. There were dozens of them lying motionless in the sand within a hundred-meter radius of the garden. "Thanks," I say. He stares at me and says nothing. egocentric, and totally amoral.
