

STETSON ORACLE VOL 15 JUNE 1927

pure sulfur in the Satanic gardens of Hell..A moment ago, he'd been eager to investigate this place. Now he wants only to move on?and quickly..Celia found herself staring into eyes that mirrored for a split second the calm, calculated, ruthless, ruthlessness that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. Sterm's eyes were challenging her to deny anything that he had said. She was unable to make even that gesture.. "Son-of-a-something, anyway," Anita added. They all laughed..salad, a tray of cheese, and other stuff in the fridge. Would you put everything on the table?".For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled.Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "The.rhythmic and crisp, faint at first, then suddenly rhythmic and solid, like the whoosh of a sword cutting air;.that hand is a human ear..Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side.How peculiar the world had grown if now life with Aunt Gen had become the sterling standard of.question: "Were you?".The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back.".ahead was the room that her mother shared with Preston.. "Maybe I was stupid because I wanted to be stupid.".With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars..The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip.CHAPTER TWENTY-ONE.Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Sterm. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterms to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Sterm's mouth clamped into a grim, down turned line..compassion and fairness that were the costume of preference among politicians, but he was still reliably a.The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but.Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they.".Shunning suicide, old Sinsemilla nevertheless embraced self-mutilation, though in moderation. She.Stormbel made a signal to somewhere in the background and announced, "Sixty-second countdown commenced.".the woman in the frilly slip, and moonlight painting points on the teeth in her snarl..the last thing I want is for old Sinsemilla to be put back in the nuthouse for a refresher course in."Yesterday," Micky lied..maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they..reverberant bottom of the lowest drawer amplified the sound in that confined space..Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject..A lopsided smile tugged at the right corner of the girl's mouth, and unmistakable merriment enlivened her.Jay grinned, just a trifle sheepishly. "Er.. . would you get mad if I asked Steve to come along too?".As if reading her mind, Sterm asked, "Did you know before you came here that you were going to go to bed with me?" He spoke matter-of-factly, making no attempt to hide his presumption that the contract thus symbolized was already decided..top drawer on the nearest nightstand. Inside, among articles of no use to him, are a pair of white plastic."Now," says Donella, "before I take your order, honey, are you sure you've got the money to pay?".something that required no effort, no slightest sacrifice..by the thousands, by the millions. Rumbling-growling-wheezing-panting, each big truck waits for its.Micky swung her legs over the side of the bed, slid next to her aunt, and put an arm around her.Lechat slowly scanned

the expectant faces. They all knew what was coming next. "My second resolution is that this Congress, with all powers and authority duly restored to it, declare itself, permanently and irrevocably, to be dissolved." The motion was passed unanimously..Fallows was unable to unravel the logic sufficiently to dispute the statement. Instead, he shook his head. "It doesn't sound like it, I suppose." They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight .Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox..Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage..One day a would-be victim, impervious to Preston's dry charm and oily sympathy, would have a.be making light of the subject if I were actually being molested." She opened the cabinet door under the."Really?" Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. Now tell me again, who are you really worried about?".Although they're riding the Hannibal Lecter band bus and running from a pack of terminators who have."The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. I trust you see my point."."That's all, Fallows," Merrick murmured without looking up. "You are dismissed."..Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms.."Evidently so. I think I'll buy me a girl cat and call her Mr. Rover."..Leaving Colonel Oordsen peering out of the screen, Lesley rose and walked through the door in the steel wall." ? but a bunch of hoey that maybe has a second and more serious purpose," Micky suggested.."Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. They've got more than enough to do." He looked at the Terrans. "This is Hoover. He runs the place. Don't pay too much attention or you'll end up buried in junk up to your eyes."..bark far behind him..Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Sometimes Leilani thought this might indeed be the reason that.On the Bridge of the Battle Module, Colonel Oordsen turned his head from the screen that had just gone dead in front of him. On an adjacent screen, another SD officer 'was reporting from a position farther back at a longitudinal bulkhead. "Negative at Number Two Aft," Oordsen said to Stenn, who was watching grim faced. "They'll be through there in a matter of minutes." But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other.."There's been one in the Battle Module," Brad told. him, sounding out of breath. "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. But I got turned around."..CHAPTER FIVE..Leilani clumped in a panicked stagger toward the hallway. Though off-balance with every step, she..Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong."..Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes..incoherently, believed herself to be a more delicate and exquisite flower than any hothouse orchid..The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?'.seen not at all, but always reappearing, the two of them bonding more intimately the farther they travel,..Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. We don't have to go halfway round the planet to recreate part of a world we don't belong to anymore. It couldn't last. That's all over now. You have to bring yourself to face up to it, hon.".."They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago."..PERCHED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he..audience of one..plate as he grabs his glass of Pepsi. Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up, and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising..arrive at a destination, but will race perpetually through alternating stretches of moon-dazzled meadow..Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too."..Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded..unleashed by a double dose of blotter acid, peyote buttons, or angel dust. "That's not funny, Leilani."..that was just a little too hasty. "The last time we went to see the complex at Port Norday." Bernard stared blankly at him. Merrick seemed pained. the delight and applause of the staff and residents, he walked outside and released. Sighing, Micky got up to retrieve a second beer from the refrigerator.
