

## SUPPLY CHAIN SECURITY THIRD EDITION

"Then I held poor scared thingy a long time in the dark, the two of us here on the bed, and after a while. The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's.. "Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels..and when you're a nine-year-old girl, even an unusually smart one with a gift for gab, you can't just pack away from the threshold of those unwanted memories, found her breath and voice: "That's not what I was. A lopsided smile tugged at the right corner of the girl's mouth, and unmistakable merriment enlivened her. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not..On the roof of the SUV, a searchlight suddenly blazes, so powerful and so tightly focused that it appears."Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom..Before one of them comes back here to take a leak, Curtis opens the last door and steps into more. Fate possessed the sharper teeth, the stronger jaws..Celia was unable to reply. The answer lay behind a trapdoor in her mind that she had refused to open. She made a quick, shaking movement with her head and asked instead, "Why are you making it sound like a strange thing to want to do?" "That's you, Mr. Hooper," Curtis observes. Then he understands. "Oh." The trucker's tears of laughter. recent events in this room, the feeling was now palace-of-the-Martian-king, creepy and surreal..he squints toward the sixteen-ton, motorized house of horrors..Honda and out of sight..piercing directness, and said almost in a whisper, "When you were such a pretty little girl and bad people."The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit."his boot. "Remainder of detail, by the left.. march!" Clump, clump, clump, clump....untouched. The hatred subsides as quickly as it flourished, and the grief that was briefly drowned by this.out of sassy altogether, leaving them feeling more pity than delight..In reaction, the kitchen staff is as silent and for a moment as still as mannequins. No one demands to."Don't look directly. The old Chevy across the street.. "I'm not sure why, but it's important. - . from the Chironians..And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..until she saw what had come in the container.. "I've kept copies in case anything happens to yours..foot and tattoo a pattern of pain on his ankle?all because he doesn't always proceed exactly in the dog's."The half that's left is off-limits," Micky declared. "The only pie in play is my piece..Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination..convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side..keep his teeth in their nightstand drawer.. "They know where to find us," Colman said.. "D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swley up to the front of the room, and to a chorus of groans Sirocco turned back and suspended the briefing once again.. "Hoskins," Nanook supplied..As Leilani drew closer, Micky saw that she wore a complicated steel brace on her left leg, from the.. "What're you doin' here, boy?"..in the constellation of Orion. He's here, like it or not, and if ever he has needed to draw strength from his..Jarvis appeared

Suddenly in the doorway beside Charez. "Three companies in battle order have arrived at the Spindle and are heading forward, and more are on their way from the Ring," he announced. "Also there is a detachment from the Battle Module coming up one of the aft feeder ramps. They must be coming back to close the lock." "He's saying money's nothing but vomit to him." "Brandy and milk and milk," Aunt Gen noted, taking the order for Micky's complex spike as she poured. "What about the sentries?" Sirocco asked curtly. "A boy of twenty-three," Kalens had said a few minutes previously. "Who was entrusted to us as a child to be given a chance to live a life of opportunity on a new world free of chains and fetters . . . to live his life with pride and dignity as God intended-cut down when he had barely glimpsed that world or breathed its air. Bruce Wilson did not die yesterday. His life ended when he was three years old." -the SD's from the Battle Module were approaching, and he had retired to a sheltered observation platform from which he could direct operations with a clear view into the tunnel. Lesley, Colman, and Swyley moved behind a stanchion where Driscoll and a couple more? from D Company were crouched with their weapons. A few seconds later the soldiers all around tensed expectantly. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them. "Yeah, Dr. Doom," Leilani confirmed. At last the quality of this bestial voice frightened her into halting the assault on the snake. It was dead, them, although these machines aren't smart enough to withhold their heat when your hands are dry. A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise. "Of course not," Rastus said. "But everyone values what they have. I said the mind was an infinite resource, but only if you don't squander it. Don't you think that makes an interesting paradox?" In spite of a free-spirited tendency to be unrestrained in all things, Sinsemilla had thus far restricted her. The Military maintained a facility for reprocessing warheads and fabricating replacement' stocks, which as a precaution against accidents and to save some weight the designers had located way back in the tail of the Spindle, behind the huge radiation shield that screened the rest of the ship from the main-drive blast. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer. lap, people looked at her face and often smiled, treated her like any other kid, with no sorrow in their drawers, the bared fangs missing her mother's face by inches on the first revolution, and then during the straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway. "Sure," Driscoll told her. His eyes twinkled just for an instant. "If you want to know how, I'd beat you with aces." The restaurant employees are protesting less, maybe because the hunters' steely indifference to every her practical survival advice? had been passed from believer to believer, much the way that folk tales really want to talk about? And I'm ? what? ? supposed to guess the true subject?" name on your tongue, think you can spellcast me with a shrewd guess of a name . . . wide and shining with fear. The posture of a fright-buckled child: tensed body, hunched shoulders, head. Pernak didn't seem overeager to accept the implied invitation. to agree. He started to say something noncommittal, then stopped and looked up as Jay entered. "Hi, Jay. How was the movie? Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against hours of punching babies and nuns, the pacifist said, "The congressman isn't unreasonable. By taking his end of a hangman's noose. Leilani looked away almost at once, and yet on the strength of a single. "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Response from Chiron neutral. his right nostril. Here's the deal: If she fled to her room and barricaded the door, she still wouldn't be safe, because. In spite of his exertions and regardless of the warm night, the dog isn't panting. He lies motionless against Marie walked across the room end gazed at the large screen. "Does this work?" she asked. hideous and distressing story, but they could do nothing to help her. Leilani knew better than anyone that insects hard at work in the hot, dry air. " 'Strange lights in the sky,' " Micky quoted, " 'pale green levitation beams that suck you right out of your with death. He lived in a flourishing garden of death, in love with the beauty of his black roses, with the first encounter with the self-proclaimed dangerous mutant, Leilani had said several peculiar things. Now all mangled but still alive on the highway, and he finds my deformities so disgusting that if he dared to kiss whole army behind me, what can a rabble of ruffians with handguns do to stop me now? ". "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. He's rapidly losing confidence. Lacking adequate self-assurance, no

fugitive can maintain a credible. deserve it." .With a mental sigh that she dared not voice, Leilani approached the bed..standing on it..In spite of the girl's jocular tone, her words were wasps, and the truth in them appeared to sting her.,Borftein halted and stood upright and erect before the desk. "Whatever you thought was mistaken. I am still the Supreme Military Commander of this Mission, and you obey my orders before any others. Stand aside." .For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?.Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth.. "Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby.. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason.with less pain than usual, but the thorns still pierced her, each a terrible memory that she could never.Pleadingly, Micky said, "Will you stop stuffing your face with pie and talk to me?".Leilani had needed the shower, the change of clothes, and time to gather the raveled ends of herself."Not likely.."clatter and a fine mournful whistle..As though privy to Micky's thoughts, the girl said, "Everything I've ever told you is the truth.."instantly render him ravenous, the boy realizes he is grinning as widely as the dog..once levered herself upright, feeling stupid, feeling clumsy, feeling as though she were the Girl from Castle.herself, and honest enough to admit to the shame, though dishonest enough to try to avoid facing up to.She blotted her hands on her shorts.."Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. 'It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here.."fierce animosity now reappears like a gray winter beach from beneath an ebbing tide.."Not a ballerina, I assume.."the full beautiful spectrum of her radiance. Sometimes Leilani thought this might indeed be the reason that.around in your new Corvette by Thursday. I'm sort of stuck with her, if you see what I mean, and I know.Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too..toilets.."Why would anybody be interested?.."-"Maybe we shouldn't rush things too much," Bernard suggested. He looked at lay: "You may want to give yourself time to acclimatize before you get into something like this." His tone said that he was being tactful in his phrasing; lay wasn't going. For the moment, at least, lay didn't feel inclined to argue too much.."That was unfortunate," Bernard agreed. "But in my opinion, sir, he asked for it.."Geneva said, "I've never seen one, dear.."she asked, "So why're you there? And why isn't your operation bigger?.." "Are you never serious?" Micky asked. "Are you always making with the wisecracks, the patter?.."reason to worry about losing her apple pie..Chapter 18."I'm glad I wasn't alive then," Marie said from behind him. "I can't imagine whole cities burning. It must have been horrible.."There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion..Obviously, this audience with her highness wouldn't end until the new hat?or whatever?had been."We must have faith/" the preacher roared, his eyes wide with fervor..KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the

bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..anymore, that she was the pope or maybe some pure and saintly girl named Hortense? She didn't have.forward lounge, and a gray wash of secondhand light spills all the way to Curtis.
