My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. I repeat, I have no more to say." The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate..Bernard stared at his glass for a few seconds, then shook his head again. Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. Carson of Third Platoon asked sourly. "If anyone gets it first, guess who." And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" Although the serpent hadn't been poisonous, the bite looked wicked. The punctures were small. No. suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up. Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory.
