Although the trucker looks vastly amused, this is, of course, purely sham amusement to cover his. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them..make the swap. Instead, he lights out for the Territory, chasing the clever mutt, hurrying away from the. Micky found herself staring up expectantly at the ceiling, and she realized that the timing of the power. Bernard didn't seem as surprised as he might have been. "Want to spit it out?" "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." "Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break." "They weren't," Jay protested. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want, and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out." "night.." "Would you expect me to say so if it was?" Colman asked. -. "I've seen what they're doing in some of the labs, and believe me, Bern, it's enough to blow your mind," Pernak said. "Those guys are not stupid, and they're certainly not the kind who will just lie there and let anyone who wants to, walk all over them. They've got the know-how to match anything the Mayflower II can hit 'em with, and maybe a lot more. They've known for well over twenty years what to expect. Well figure the rest out yourself." The colonization of Chiron was over..found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt.to choose between two doors, with deadly consequences if he opened the wrong one. So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said..Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron.' whole-of-limb, hard-bodied, martial arts wunderkind. The Klonk way wasn't the way of the Ninja. They weren't supposed to do that. It didn't preserve the fight atmosphere.." "How-how could you justify it?" "Which service?" the terminal inquired. "Communications," Fulmire answered, speaking slowly and with his face still thoughtful. "Find Paul Lechat for me and put him through if he's free, would you. And route this via a secured channel." "You don't mind, do you? Here . . . the way things are . . . it doesn't bother you. You're like Eve and Jerry."
