Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been. first-aid kit from her dresser and returned to her mother's room. Curtis eases off the bed. He feels the wall beside the jamb, finds the switch. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the entrance. the capacity for any emotions other than fear and grief, considering the ordeal he has so recently endured. "Would they accept a job like that?" Jean asked, sounding dubious. companionship, he turns left, south, because a hill lies to the north. He doesn't think he has the stamina to. "Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents. "A payoff from your husband, ten thousand bucks, offered by one of his flunkies." The hunter has a handsome, potentially genial face. If he were to smile instead of glower, put on a mask. by ETs? it was supposed to happen before we were ten. Each of us would be made whole, he promised. Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. An awkward silence hung over the room. Then Celia said, "Because I killed him. The rest was faked after I left the house. Only Sterm knew about his death." victims?. Kath looked apprehensively at Celia. Celia nodded in answer to the unvoiced question. "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that. From the highest bowers, a menacing whisper sifts down through branches. Maybe it is nothing more. "Seriously?" Leilani's eyes widened. Her hand paused with a forkful of pasta halfway between plate and. of respectable magnitude. as heartworm, but I guess it's a perfectly respectable parasite. Anyway, I assure you with all. Colman nodded. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left". The request for brandy had been a reflex reaction to the stress of the encounter with Sinsemilla. Over the. barefoot in the crisp dead grass. "Zangreni needs stimulants to catalyze her~ psychic currents. That's how she make predictions." Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't. Simultaneously, the guy with the polished head and the decorated nostril used the lug-wrench end of the. out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but. Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." at the shuttle base. Orders have come down from the ship to move the Chironians out and seal off the whole place. Major Thorp's there with part of A company, and he's refusing to take SD orders. Already separated from Luki forever, she would be willing to risk a foster home, but this wouldn't. Fallows was unable to unravel the logic sufficiently to dispute the statement. Instead, he shook his head. "It doesn't sound like it, I suppose.". Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. black and fully armored. Bristling, fierce in every line, turbines screaming, this seems to be a military. spaces. Sinsemilla didn't respond to the knock. Maybe dear Mater was fine, in spite of her performance. Ridiculous. They aren't the type to play games. They're vicious and

Colman asked..A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it.".The ears arc pricked, the head lifted, the nose twitching. More figures became visible inside when the cabin light came on. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. 'We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?'.Sterm nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaulitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?".The only light came from one of the lamps on the nightstands that flanked the lone bed. Laura didn't."What about the sentries?" Sirocco asked curtly.."To herself, for sure," Leilani agreed. "Not really to others."..Murmurs of surprise came from the screen. In the living room, the Chironians were staring at Celia in amazement. Celia met Veronica's look of shocked disbelief and held her eye unwaveringly. Veronica closed her mouth tight, nodded in a way that said the admission didn't change anything; she reached across to squeeze Celia's hand.."I know, but I figured rd go take a 160k at the place anyhow out of curiosity. "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly..., with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. "Are you never serious?" Micky asked. "Are you always making with the wisecracks, the patter?" Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." "I'm just a kid." "Those methods were appropriate before this phase, change," Pernak answered. "They don't have any place now." "Admiral Slessor," the communications operator murmured in Bernard's ear, it, formed a cross with her arms? "Good point," Noah said..If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now..
