On a day exactly eight months after the disaster, two discoveries were made. One was in the whirligig garden and concerned a new plant that was bearing what might be fruit. They were clusters of grape-sized white balls, very hard and fairly heavy. The second discovery was made by Lucy McKillian and concerned the absence of an event that up to that time had been as regular as the full moon. been chosen as a compromise. What it meant was that the exploring parties had to either climb up or go. "Nothing yet," said Amos. "But we can help you if you help us." "That's fine, but there is an even more important order of business. We have to go out to the dome and find out what the hell caused the blowout. But, clearly, he had just failed a major test With a sigh of weariness and a triumphant smile, the woman rotated her sofa around one hundred and eighty degrees and drove off in the direction of the couple chained together on the blue settee. What brought another of those incredible smiles was the interior. Not only did the carpeting continue up the walls, but as she walked from the kitchen, across the lounge area to the fireplace, and turned to look up at the sleeping loft, each place her feet touched a patch changed color to a pale, clear yellow. She stared, then laughed and ran her hands along the back of a chair. It, too, changed color, to a pattern of pastel greens and yellows. Crawford ran his hands through his hair, wondering what to say. That possibility had been discussed, and was being studied. But it had to be classed as extremely remote. "By the time I filled Lucas McGowan in on all the details (I got the impression he was less concerned with his wife's infidelity than with her taste; that it wouldn't have been so bad if she'd been shacking up with movie stars or international playboys), collected my fee, and grabbed a Thursday special at Colonel Sanders, almost two hours had passed. Harry hadn't answered my knock, and so I let myself in with a credit card. Nolan stood by the window watching as Nina moved away across the clearing. For a moment she. "Mary, I told you about that already," he complained. It was a gentle complaint and, even more significant he had not objected to the use of his nickname. He was being gentle with the condemned. "We worked on it around the clock. I even managed to get permission to turn over command temporarily. But the mock-ups they made Earthside didn't survive the re-entry. It was the best we could do. Some of the labels curled up and detached themselves after twenty-six hours without. I couldn't find a morning paper at that hour closer than Western and Wilshire. The story was on page seven. Fortunately they found the body in time for the early edition. A woman named Sybil Hern* don, age 38, had committed suicide in an apartment court on Las Palmas. (Detweiler hadn't gone very far. The address was just around the corner from the Almsbury.) She had cut her wrists on a piece of broken mirror. She had been discovered about eleven-thirty when the manager went over to ask her to turn down the volume on her television set. enough to discourage anybody from trying to scale it. "I can't say I have. I always mean to, but you know how it is. It's the same with the Statue of Liberty. It's always there, so you never get around to it." After the love-making Nolan needed another drink. He went down the hallway to the other bedroom. The door was ajar and he moved past it, calling softly. "Mama Dolores?" Yet cloning would not be totally useless, either. There would be the purely theoretical advantage of studying the development of embryos with known variations in their genes which, except for those variations, would have identical genetic equipment (This would raise serious ethical questions, as all human experimentation does, but that is not the issue at the moment). "What is this?" asked Hidalgo as they stepped inside. She picked up the glass prism from the top of the barrow. summer. Climb on my shoulders and I shall carry you up to the highest peak of this mountain. When I have looked. "I suppose, then," said Amos, "I've done well to avoid coming here." And he turned around and left. "What did you find this time, Harry? A nest of international spies or an invasion from Mars?" I guess. "I think this discussion has served its purpose, which was to convince everyone here that survival is possible." He glanced uneasily at Lang, still nodding, her eyes glassy as she saw her teammates die before her eyes. She smiled at them and said, "I am glad you have come for the second piece of the mirror, but it is buried in this frozen shard of ice. Once, when I was a girl, I chopped through a chunk of ice to get to an earring my mother had dropped the night before in a winter dance. That block of ice was the coldest and hardest ice any man or woman had ever seen. This block is ten degrees colder. Can you chop through it?" She touched the small of her back. "A kind of short circuit Worse than bending over is twisting sideways. his ears. The dome was dancing and straining, trying to fly. The floor heaved up in the center, throwing another cabin." It was a sad Amos who wandered through those bright piles of precious gems that glittered and even without cloning, and the ordinary process of supplying new soldiers for despots is infinitely cheaper. Columbine had joined her husband in Wilmington, Delaware, and there was no knowing when, if ever, get back to the cell. Then Amos walked out to the boat with the broken glass. "Bullshit," said Barry.
