companionship, he turns left, south, because a hill lies to the north. He doesn't think he has the stamina to. "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?" "Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It.Finally, the congressman went to the door of the two-story craftsman-style house and rang the bell..The kit was a deluxe model, similar to any fisherman's plastic tackle box with a clamshell lid. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces. Those functions are now transferred to me."..most definitely didn't need a caffeine jolt. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured.."I'm not suicidal. I'm just a wiseass."..When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked..it with two strips of waterproof tape. Nice. This tender, quiet caregiving was almost a normal..scoffed derisively. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. "Now what do you think would make you walk like that when people shouted at you?".."It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact

Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all." The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart..With only a wistful expression, Rickster said that being able to turn yourself loose, whenever you wanted.might instead he more of the ferocious killers who struck in Colorado and who have pursued Curtis ever."Bret's an unarmed-combat instructor with the Army," Tim explained..Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on-houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours? ".She's my father's sister, so she was part of the deal"..and she went inside..and country-and-western bars from Omaha to Santa Fe, to Abilene, to Houston, to Reno, to Denver..gunfire, leaps at him, like a playful dog, and tosses his hair..shoulders length auburn hair was tied back in a ponytail, and she was wearing tan slacks with an orange silk blouse covering firm, full breasts.

She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..Earlier Noah had loaded the tape in the VCR. Now he pushed PLAY on the remote control.."You don't have problems when fanatics start getting together with causes worth dying for?" "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. In his sixties, he had shouldered twenty years' of extraterrestrial senior responsibilities and two consecutive terms as Mission Director. Although a metallic glitter still remained in the pale eyes looking out below his thinning, sandy hair, and the lines of his hawkish features were still sharp and clear, a hint of inner weariness showed through in the hollows beginning to appear in his cheeks and neck, and in the barely detectable sag of his shoulders beneath his jacket.
