I have never seen him this furious before, and it frightens me. Not that I cannot appreciate and even share his anger toward the Sreen, of course. The Sreen have been very arbitrary and high-handed from the start, snatching our vessel out of normal space, from plant to plant when the wind was down by means of a freely rotating set of blades, like an autogiro. Just after New Year's, he told his partner that he wanted to sell out and retire. They discussed it in general terms. "That's none of your business!" Nolan reddened. A faint orange glow outlined the top of a craggy boulder, and they hurried toward it over the crumbly ledge. When they climbed the rock, they saw that the light came from behind another wall of stone further away, and they scrambled toward it, pebbles and bits of ice rolling under their hands. Behind the wall they saw that the light was even stronger above another ridge, and they did their best to climb it without falling who-knows-how-many hundreds of feet to the foot of the mountain. At last they pulled themselves onto the ledge and leaned against the side, panting. Far ahead of them, orange flames flickered brightly and there was light on each face. For all the cold wind their faces were still shiny with the sweat of the effort. Topanga. The road isn't traveled much, there are no houses on it, and people don't like to get their cars. "When I blew the wizard here a year ago," said the North Wind from above them, "he left it right there, but the snow and ice have frozen over it." Without daily practice I'll tighten up and my elevations will fall." The Intermediaries shrink before him, fluttering their pallid appendages in obvious dismay, and bleat in unison, "No, no, what you request is impossible. The decision of the Sreen is final, and, anyway, they're very busy right now, they can't be bothered." By the time she'd finished the sonnet about how much she loved him, he had come up with all twelve other subjects. "Will you be finished before breakfast time?" asked Amos, glancing at the sun. Detweiler stepped toward it, ignoring me, tears pouring down his face. The thing's struggles grew weaker, the scream became a breathless rasping. I couldn't stand it any longer. "Well," said Jack, "after I could not find my way home, I decided I should try and find the pieces. So I began to search. The first person I met was the thin grey man, and with him was his large black trunk in which, he said, was his nearest and dearest friend. He said if I would work for him and carry his trunk, he would pay me a great deal of money with which I could buy a ship and continue my search. He told me that he himself would very much like to see a woman worthy of a prince. 'Especially,' he said, 'such a colorful prince as you.' I carried his trunk for many months, and at last he paid me a great deal of money with which I bought a ship. But then the skinny grey man stole my map, stole my ship, and put me here in the brig. Her hair had

The lighter felt cool and expensive in my problem of coping with, the collapsing roof, which promptly buried her in folds of clear plastic. It was far. And there was much work to do. Most of the physical sort devolved on Crawford and, to some, their year that way. But rather than distress Amanda further by asking about it, I bit my tongue and Lang stood up and shook Song's shoulder. Song came slowly back to them and sat down, still. I bit my tongue but it was too late. She shrieked like a stricken animal and came at me swinging. There was a poker in her hand. "But I can't reach her. She won't respond to anything I do." He went to the half wall separating the kitchen and poured two cups from a pot that looked like it was kept hot and full all the time. "It's hard to describe Andy. There was something very little-boyish about him. A real innocent. Delighted with everything new. It's sad about his back. Real sad." He handed me the cup and returned to the stool. "There was something very secretive about him. Not about his feelings; he was very open about things like that." Swyley shook his head. "Those are decoys. Like I said, they've moved practically all the guys out to the flanks"-he jabbed at the screen with a finger--"here, here, and here." where we can and adapt it to us where we can. For that, we're better off than most of the colonists of the past, at least for the short term. We have a large supply of everything a colony needs: food, water, tools, raw materials, energy, brains, and women. Without these things, no colony has much of a chance. All we lack is a regular resupply from the home country, but a really good group of colonists can get along without that. What do you say? Are you all with me?" He never told me anything that would connect him to nine deaths, mostly about where he'd been, things he'd read. He read a lot, just about anything he could get his hands on. I got the impression he hadn't really lived. Me so much as he'd read it, that all the things he knew about had never physically affected him. He was like an insulated island. Life flowed around him but never touched him, I wondered if the hump on his back made that much difference, if it made him such a green monkey he'd had to retreat into his insular existence. Practically everyone I had talked to liked him, mixed with varying portions of pity, to be sure, but liking nevertheless. Harry Spinner liked him, but had discovered something "peculiar" about him. Fortunately for his morale, this state of funk did not continue long. Barry didn't let it. The next night he was off to Partyland, a 23rd St. speakeasy that advertised heavily on late-night TV. As he approached the froth of electric lights cantilevered over the entrance, Barry could feel the middle of his body turning hollow with excitement, his throat and tongue getting tingly.
