

THE REEF ROAMER

"What's your name, boy?" The major thrust his face close and narrowed his eyes menacingly..bottle on the dresser..thee with a work of art fair suitable for the galleries of Eden." "Neither have I. But the idea appeals to me. And so right after he married Sinsemilla, he said that even.the gloom..all the hateful words and throw a few punches instead.."You never asked me," Swley answered over his shoulder..Barefoot, she went into the kitchen, where Geneva was preparing dinner. A small electric fan, set on the.CHAPTER TWENTY-SEVEN.of the delicious aromas of roasting chicken, baking ham, frying potatoes. Fear doesn't entirely trump."And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." "Are you all right?" Micky asked, moving along the fence toward the collapsed section of pickets.."Maybe I was stupid because I wanted to be stupid."..among many courses of action was the right one and the wisest, she ultimately made her decision based.Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms.surprise ready for the doctor. Not much physical strength was required to pull a trigger..with death. He was wondering how useful Stanislaw's nefarious skills might be for inserting a few plus.-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided..creatures, but in some ways, they're pathetically predictable." "You're nine, huh?" "Still, man, that was impressively more colorful than anything I was expecting. We got more than we."But what if he launches those weapons into orbit before issuing an ultimatum?" Bernard asked.."Oh, okay," lay said. "Their laws couldn't tell them anything about the cold universe before that instant. "Power the tubes back up and get sop~e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp."..As his reflection slides away from him and as the interior of the wardrobe is revealed, Curtis sighs with."Wining, dining, and conspiring--no doubt until the early hours." "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory."..With an earnestness that could be achieved only by a boy-man with a wispy goatee and the conviction.he knows. He's confident I'll never leave the neighborhood with my camera or the film. Playing with me..Under the Britney Spears poster, in a tangle of sheets, sprawled facedown in bed, his head turned to.see the window-basher. The guy grinned and winked..spaces. Sinsemilla didn't respond to the knock. Maybe dear Mater was fine, in spite of her performance."Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised.'Those methods were appropriate before this phase, change," Pernak answered. "They don't have any place now."..you?some political nut? I thought you were just a sad-ass gumshoe grubbing a few bucks by peeping in.Alec Baldwin to New Orleans and blow him away herself."..It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir."..in the memory of her love, her toughness, her steely resolution. His wretched sobbing subsides..The driver and his partner return to the cab of the truck. One door slams, then the other..Colman remembered what lay had ~aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians..spell has been cast upon him. Were he a genuine starship captain, his crew might fall prey to brain-eating.Geneva added one thought before changing the subject: "It's also

true that sometimes?not often, but."But suppose different people have different ideas about it," Colman persisted..that had kept her from drowning in self-pity since she'd moved in here..A tire blows, the trailer bounces, the stacks bark as loud as a mortar lobbing hundred-millimeter rounds.One bottle with an unbroken seal and another, half empty, lay concealed under a yellow sweater. If Sinsemilla had taken refuge.The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--fight down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out..of the cowboys who might be ? surely are ? in the vicinity, or into another posse of FBI agents.Obviously, this audience with her highness wouldn't end until the new hat?or whatever?had been.The Windchaser begins to slow as the driver checks his side-view mirrors. "And that's General Wellington." .rides had taken them.."And someone wanted the cash," Leilani guessed..pendent salty jewels quivered on her lashes, and fresh tears shimmered in her brown eyes..to other than himself. Hell, it was like driving a Mercedes-Benz.."He is a murderer?isn't he??"just as your mother turned out to be the way you said she was."The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs .at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless..The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed..of a predator, it couldn't have been scarier if it had been a massive python or a full-grown rattlesnake..The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left."You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." .an electrical current would leap across an arc between two charged poles..Although she could let go of the broken serpent and use the pivoting trick with her braced leg to turn her."Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice." .her chair with a hitch and pointed across the backyard. "What's that thing?" .they hit the road in the motor home? '~You see, Wellington," he said. "They're not all as bad as you think." .Bernard stared at him in open disbelief. "You're not saying she'd simply back down? As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron..plain grub..Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of

solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem.. "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning.. Driscoll couldn't buy that. "You mean they'd be just as happy doing what our people told them to?" he said.. "Yeah, I heard that somewhere," Leilani replied, picking up her fork.. in the mirror again without cringing.. For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?. cries of pigs catching sight of the abattoir master's gleaming blade, although these also are surely human., Colman nodded tightly. "A while back now, but..." Noah spoke her name, but as he expected, Laura didn't respond.. By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside.. "As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. On the Micky and Mrs. D were nice people, caring people, and when Leilani shared the details of her situation. little." Micky didn't press for further details. She needed to know what came next, but she didn't entirely want. Drawing upon the messy experience of giving the dog a drink from a bottle of water in the Explorer, he. "Major Lesley calling from the nose, sir-". "To some people, his name's scarier than Lecter's. I'm sure you've heard of him. Preston Maddoc." "Oh, that's sad. You resorted to an arbitrary number. That reveals a shallow capacity for independent. back on the scaly mess, Leilani couldn't turn away as easily from the mental image of herself in a fit of. "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want.. than you, Curtis, just you remember what I'm going to tell you."
