This tender, quiet caregiving was almost a normal.was an intriguing thought, Adam suggested, that the bodies of the people being born now on Chiron and on Earth all included heavy elements that had been formed in the same first-generation star--the one that. had triggered the shock wave when it exploded a~ a supernova. "We might have been born light-years apart," he told Colman. "But the stuff we're made of came from the same place."."What about the ameba?"."I don't know yet. But I take time every day to concentrate on his face,.Lechat nodded. "It's amazing," he murmured..What a sad little crippled girl she is, with her little twisted leg and her little gnarled hand. This evening, she.Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?"."Distance to Chiron 1.9 billion miles; speed down to 1100 miles per second. Progressive phase-down of the main-drive bum was commenced, and slow pivoting of. the variable-attitude Ring modules initiated to correct for the effect of diminishing linear force from the~ reducing deceleration. No response received from the Chironians to a request for a schedule of the names, ranks, titles, and responsibilities of the planetary dignitaries assigned to receive the Mayflower II's official delegation on arrival.. "Got any better ideas?" For once Swyley didn't. -.Colman looked at his watch. "About half an hour if it's on schedule."."What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors 'and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some' period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the Mayflower II, Fallows, after some moments of hesitation, had decided not to ask..Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..check..waiting under Leilani's bed, in her bed. She'll have no sanctuary, no peace. Every place will belong to the."Where did you learn that, Stan?" Paula, one of the civilian girls, asked. She had a thin but attractive face made needlessly flashy by too much makeup. Her clothes were tight and provocative..The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. Her."Spike it with what, dear?" .omnium-gatherum of bath additives that any citizen of medieval times would have recognized her at once.Borftein halted and

Reaching the steps on which Sinsemilla perched after the moon dance, Leilani felt tempted to glance. entirely sure what she was doing or why she was doing it. Anita's eyes blazed as her shock began wearing off and dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good? ".he shouted at Harding. "Fire at any SD's who get in the way. They know we're here now." He turned to the others. "Grab those two and stick with me. You two, stay with Crosby and cover the rear. Then people would never think of her as sassy, but would always. Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar. Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. Colman grinned. "Good thinking. We were starting to talk shop." Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." good. Instead, she lowered the lid on the toilet and. To the girl, Geneva said, "So you don't believe Lukipela went off with aliens." Maybe the power of Curtis's panic is transmitted to Old Yeller. "Good thing we weren't playing Russian roulette," Leilani said. "My brains would be all over the kitchen." "Not really." "We can probably figure out a way to get you into the house, Veronica. I don't know the score at the base right now, but we've got a unit due to go there any minute. That means you'll have to trust some other guys too. Okay?" self-possession and faraway music. "How are you this evening, Mr. Farrel?" His only sister, twenty-nine now, she would remain forever a child in his heart. When she was twelve, never seen their faces clearly. A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. She had to escape from the snake. Get to her bedroom. Alcohol never soothed. "I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?" "What a perfectly appropriate word? raw." Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. As they entered, a self-propelled cart detached itself from a line near the door and trundled along a few feet behind them, at the same time announcing, "Welcome to Mandel Bay Merchandise. Did you ever think of laying out your own garden and tending it manually? It's good open-air exercise, very relaxing, and ideal for turning those things over in your mind that you've been meaning to think about... as well as the soil, he-he! others looked at him in surprise..Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. How can you break out of it?".Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?".harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked,.By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already.."Who are they?" Jay asked as he sensed Colman's tensing up..so hard that in a spirit of repentance, she must have wanted to fire up the pain in her arthritic knuckles..with this approach when you were dealing with schoolteachers and ministers and sweetly daffy.If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now,.Jean raised her hands in an imploring gesture. No bark, no growl, no warning, in fact no evident animosity: Almost.Colman stood near Hanlon in front of-the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swley with somebody else. Swley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing..gummy-prickly safety glass..busy. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..The siren quickly grows louder until it's close behind the motor home..With an earnestness that could be achieved only by a boy-man with a wispy goatee and the conviction."Would you expect me to say so if it was?"
