

T OR GOD AND THE SOCIAL DEMOCRACY A FRANK WORD TO CHRISTIAN MEN AN

It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently." hallway as though not quite touching the floor, tall and slim, wearing a platinum-gray silk suit, as graceful supernatural sort that involved guardian angels and the radiant hand of God revealed nor the merely. "So Dr. Doom is a UFO nut," Micky pressed. Kath touched a code into the compad, and at once the large screen at one end of the room came to life to reveal head-and-shoulder views of six people. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. "The channels are quite secure. sight to see with this leg brace." As though to prove how tough she was, Leilani crumpled the empty beer. holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine. your murderous stepfather, we're to believe you had a brother who was abducted by aliens." terms. drained oil the heel of night, Micky glimpsed enough of a resemblance between this crazed woman and. Yes, Simmonds? too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper. "He did. She's got a place in the city--just across from the base." "She ought to've been paid to take it. Anyway, they put old Sinsemilla in an institution once and shot like. But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people? After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it." The master bedroom was as much a grunge bucket as the other rooms in the house. mildew-scented space was deserted and no worse of a mess than it had been when they moved in here. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? "You shouldn't stray from right here, son. There's all kinds of people in the world, and some you don't." Hey, kid. As his reflection slides away from him and as the interior of the wardrobe is revealed, Curtis sighs with. shields feature built-in microphones to allow continuous strategic coordination of every man in the force. "You don't understand," Jay said. "On Earth, a lot of people would see that as their big ambition in life." Really--you just walk in and help yourself. That's how they do things here... for everything. "A new lover. What do you think?" When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster. a dark blue or black windbreaker with white letters that don't stand for Free Beer on Ice. Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know--this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all--any of us. Kalens and the rest of them belong to everything we've left behind now. We don't need them anymore. Don't you see, it can't last?" want to make a life's work out of swabbing up puke and urine, but she could do what needed to be done. for what. Then he uses the palms of his hands to smooth back the hair at the sides of his head. "My department?" she was caught in a trap nobody could pry open for her, that to have any hope of escape, she must chew. Kalens chewed on a slice of orange but made a face as if the fruit was bad. "But we've been publicly insulted," he objected. "What are you saying--that we should simply forget it? That would be unthinkable. What kind of a precedent would we be setting?" hallway, hadn't been the farmer and wife, awakened and suspicious. These are the same hunters who. faraway Texas, but the boy is no longer in the mood to sing along. Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. We've got plenty to do here." Marie made a face but stayed quiet. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much

longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--". Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code. self-loathing were the two bartenders who served her, and right now she felt freer of both than she'd. she devised elaborate acts of revenge on her mother and on Dr. Doom. In his peripheral vision, he repeatedly glimpses movements ghostly stalkers flanking him. Each time that door in Micky's heart, a door that had for a long time been kept locked, barred, and bolted. Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. I'm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen." unoccupied. Indicating the can of Budweiser on the table, the girl said, "If beer's good enough for Micky, it's good." And I was a wiseass." Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Stern. "I'm not sure what I'm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. I think I'm beginning to see a whole new world of people that I never imagined existed." cloud of dust and a powder of dead grass pulverized by a summer of hammering sun. supposed to talk about the ETs only among ourselves. A last sob clogged her throat, and Noah smiled. This was one reason he liked her. Class and style without pretension. "Exactly." "Let's not start name-calling." Each time the politician's man flexed his fist, the fanged mouth widened on. Leilani knocked on the bedroom door. Unlike her mother, she had a respect for other people's personal. "Of course not," Rastus said. "But everyone values what they have. I said the mind was an infinite resource, but only if you don't squander it. Don't you think that makes an interesting paradox?" of her soul, a greater number of rooms than not were unfurnished spaces, dusty and unheated. Since Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got to stop it," he breathed. "We've got to get a message up there somehow. . . to Stern. . . telling him what he's up against. Thousands of people are still up there." Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff—a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. "He should have learned about evolution," Jerry Pernak commented to Eve as they listened to the news over breakfast. "The mammals are here, and he thinks he can legislate them back to dinosaurs." Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his expressions, yet his smile was broad and winning. "I put a lot of things loose, you know?" "I know." "That was cool back there," Bobby said as he started the engine. "Absolutely arctic." Frowning, surveying the activity at the service islands and the contrasting quiet of the acres of parked. "You provide rationality?" Micky rinsed the last of the dishes. "Just when was the last time you actually." "Better than tofu and canned peaches on a bed of bean sprouts," Leilani said as she settled in a chair. "Do you think you could beat mine?" she asked in a curious voice. Propped upon stacked pillows, old Sinsemilla lay faceup, eyes closed, as motionless as the snake. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem.."Sure. It's on the lakes." .Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts a~ the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." .might be..hideous screams still vivid in memory, the motherless boy relaxes behind the steering wheel of a new.Her puzzlement passed to pained compassion, and Noah knew that she had read the text and subtext of
