one or two exceptions, I'll ignore silent films as being for the most part lost in the dim past.) If clones can be produced wholesale, a biologist can have a whole group of animals with identical genetic equipment; a set of ten thousand identical-twin mice, let us say. There are many animal experiments that can be conducted with the hope of more useful results if the question of genetic variation could be eliminated. Nolan thought of the hatred in Nina's eyes, and he shuddered. "Then what did she do with him?" Her pictures, though, did not do her justice. Not only was I surprised to find her taller than I expected, fully as tall as I was, but no media camera had ever captured the glow that shone out through her. She patted him on the back.
