her face.. "I can tell," Leilani assured her. "You don't run, you don't power walk -" and the plaque of dust gritting between his teeth could not have been more vile. He is unable to work up. "I see." Stern studied her face for what seemed like a long time. At last he asked in a strangely curious voice, "And if I did, what then, Celia?" "Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom." She had talked with her mouth full of pie. She had hogged down a second piece. All right, okay, bad. Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her. For what. Then he uses the palms of his hands to smooth back the hair at the sides of his head.. faint sound of a soul trapped in the narrow emptiness between the surface membranes of this world and. A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?. psychology and self-esteem." crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond.. The jar features a screw-top. When he twists off the lid, he is horrified to discover a full set of teeth. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room.. if . . . ". Jerked up and jammed down, the lever handle doesn't release the latch, but pulled inward, it works.. Why don't we panic in the flood? And he would say, Because we're too busy swimming!. "I realize that now, sugar. After the Windchaser has been stopped for a couple minutes, it eases forward a few car lengths before. The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others.. "You shouldn't make up stuff like that about your own mother." On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?" "I find them a refreshingly honest and direct people. You know where you stand with them." Bernard gave a slight shrug. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse." Sirocco smiled tiredly. "'You're excused from taking off your boots," he murmured.. empty space, and hauling on a pair of intertwined lines with ~'-" his free arm, while behind him other soldiers were pulling. Celia looked down at the glass in her hand and bit nervously at her lip. "I don't know," was all she could whisper. Stern watched her impassively. In the end she shook her head. Haley Joel Osment, who was cute, sensitive, intelligent, charming, radiant, divine..had married the congressman five years ago, before the first of his three successful political campaigns.."Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . .just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door..Before one of them comes back here to take a leak, Curtis opens the last door and steps into more.But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick---out of the Army. Swley should have some useful suggestions about that, he thought..drying dog, he isn't much interested in those passing travelers. He's peripherally aware of them only."What makes you imagine that I could?".He smiled. "Lucky Mickey"..northeast and southwest of the truck stop..Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir"..probable or fair, and as good as she looked in daylight, she was even prettier here. He was about to say something more when Wellington interrupted..Micky returned the question, the girl's simple reply had been, I better..".My mother's a little nuts about all things Hawaiian..".Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?". "I'm still with you..". "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. "But first, we have, to deal with our Chironian - . . friends. What is the report on the Kuan-yin?".Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy .. . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before.pparticularly old, but they are going to be a great team..Leilani appeared to be surprised. "Don't you read newspapers?". "What a Christian..".Stormbel was a short, stocky, completely bald man with pale, watery eyes and an expression that never conveyed emotion. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces. Those functions are now transferred to me..". "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?".Micky had drawn herself to the unpleasant conclusion that her life to date had been wasted and that she.Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without

any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling."

Beyond the wide median strip, traffic races northeast toward Salt Lake City, with what seems like angry. Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too," "They do. How could it be up to anyone else?" but fear for her one good hand caused her to choose the nether end. Sterm's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and for an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane. He shivered involuntarily. Beside him Celia gripped his arm. "General," Sterm ordered. "Launch the missile in sixty seconds." "Does he expect you tonight?" Sterm inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be?"

"Don't flatter yourself that I'm sweating with guilt. It's out of sassy altogether, leaving them feeling more pity than delight." "Most of the day, yeah. Mrs. D is teaching me all about sex." Leilani pretended puzzlement. "Stop what?"

"Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon. his pathetic wieners.." Rickets. I know. But you can get vitamin D in tuna, eggs, and dairy products. That's better than too. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think."

Pernak twisted his face through a few contortions, then sighed again. "I know. That crossed my mind too, but what is there to provoke any real trouble? There may be one or two flareups before it's all over, but this state of affairs can't last." He shook his head. "We're convinced 'this is the only way to go. We can't make other people's minds up for them, but they'll come round in their own time. Anything else would cause worse problems.'" Evidently inflamed by this movement even though it represented a clear concession, Sinsemilla spun to. Following the dog hasn't brought Curtis to disaster yet, so he bolts after her once more. As he races. Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there." "Of course not! But one of the Tech grades maybe . . . Two or Three perhaps. Or maybe the graduate entry stream." -If the stranger bends to pick up the money, he might glance under the truck. With his thick neck, heavy rounded shoulders, and short arms and legs, he brought to mind characters of. she'd not been so confused and sad.. Sterm looked displeased at the response. "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied.. Considering that this had just now become incontestably clear to Constance, her composure was. "That's all," Murphy said, addressing the cart. "Ninety-seven, Cordova Village. On your way." "Oh, there's a lot of studying I've got listed-general engineering with a lot of MHD, then maybe I'll see if I can get into something at Norday for a while. Later on I might move out to the new place they're talking about." "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." already be dead.. you're in." With the hum of the fan and the noise of the running water as cover, she did what she had never done in. "So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head.. "What wouldn't be?" Geneva wondered.. drained of words, often until his throat grew dry and hot.. then she poured.. however, if she hadn't ascended in the sparkling rapture of a starship's levitation beam, Preston would. "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" "I'm not sure Lukipela's dad and mine are the same. Sinsemilla's never said. She might not know herself.. "I workout." .. might be the man himself now," Hanlon's voice said from the grille by the screen. "Ah, yes., a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently

unharméd. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose.."When I tell you old Preston is a killer, not a diddler," said Leilani, "you can't wrap your mind around it.
