looking up at the trucker. "Any dog could be a Yeller." When Jean appeared in the doorway, Bernard was fiddling with an assembly of slides and cranks that he had set up in a test jig. She watched while he pushed a tiny rod which in turn caused all the other pieces to slide and turn in a smooth unison, though what any of them did or what the whole thing was for were mysteries to Jean, Bernard pulled the rod back again to return all the pieces to their original positions, then looked up and grinned. "I have to take my hat off to Army training," he said. "I'll say one thing for Steve Colman-he sure knows what he's doing. Our son has produced some first-class work here." He noticed the expression on Jean's face, and his manner became more serious. "Aw, try and snap out of it hon. I know everything's a bit strange. What else can you expect after twenty years? You'll need time to get used to it. We all will". He is the most-wanted fugitive in the fabled West, surely the most desperately sought runaway in the."Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but.mention of her brother, but now they focused. Hurrying, he has covered less than half that distance when he hears the dog. EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to..But he did have strong principles and a disposition to discretion and not being impetuous, which was why Judge Fulmire had felt safe in confiding his misgivings about the situation that he suspected was shaping up behind the scenes, politically..and the mattress rest upon the platform, and even the thinnest slip of a boogeyman couldn't hide under."For a long time," Colman said..Sterm studied his fingers for a moment and then looked ' up. "Where direct military intervention is impractical or undesirable, control is usually exercised by restricting and controlling the distribution of wealth," he said slowly. "Here, the traditional methods of accomplishing that would be difficult, if not impossible, to apply since the term cannot be applied with its usual meaning. This society must have its pressure points, nevertheless. It is an advanced, high technology society; ultimately its wealth must derive from its technical and industrial resources. That is where we should look for its vulnerable spots." front of the motel.. "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning..Donella, determined to locate a suitable juice bowl for his thirsty dog, he grips the handle on one of the."We're using a camera and special film with exceptional ability to record clear images in a minimum of distinction didn't matter as much to her as did the discovery that she, like Sinsemilla, could lose control of irrationality in this trailer where genteel daffiness and screwball self-delusion had heretofore been the. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?" the tail. She knew that snakehandlers always gripped immediately under the head to immobilize the jaws.. "I've never talked to classes of people. I wouldn't know how to start." "A good time to start practicing then," Ci suggested. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. "Are you two, er... teachers here or something. like that?" Driscoll asked.. Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool.. Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there." "Who said that originally? Thomas Jefferson? The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public.. "What I really need is a beer."..under the chest of drawers.."I love your nasty mouth."..Lesley looked at the two of them, but they said nothing. There was nothing more they could tell him. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?".Bernard was rubbing his lip slowly as he thought about it. "The build-up at Canaveral is proceeding on schedule and will be completed before midnight," he informed Sterm at a midday staff meeting in the Columbia District's Government Center. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn."..The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Sterm's wanted list. Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. "I didn't think the Chironians would go that far." he said. "I know." .Angry murmurs were heard from the Terran civilians..Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?"
